Part B for

SUBJECT

Supply of Power to the Government of Andhra Pradesh.

31.10.53 / 30.10.57 | Env

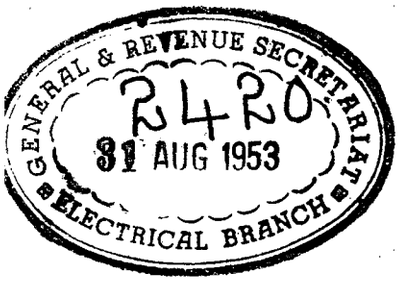
WD 08758—GPB—50,000—10-10-58

G.L. No. PWD 1049 PLS-) dt-7th Sep. 195-)

The Secy to the Govt of Andhra Prad
PWD.

Fisal 258-3373

(1)



Note.

Subject: Supply of power to Ceded Districts.

An agreement was entered into between Mysore an Madras on 1-9-1947 according to which Mysore Government offered to supply 4,000 K.W. of power in bulk to Madras for the purpose of consumption in the Ceded Districts. Power supply appears to have commenced in the year 1949, and the agreement is due to terminate in the year 1957, being in force for a period of 8 years only.

2) The seven taluks of Bellary which are proposed to be transferred to Mysore form part of the Ceded Districts for which the above-mentioned power supply was intended. Actually, the Madras Government are taking power in bulk at Sokke, a village in Chitaldrug District close to the Bellary border, and distributing the power to the Ceded Districts by means of their own transmissio lines and a portion of the power to Tungabhadra Project both in Madras and Hyderabad territories. The effect o the provisions of the Andhra State Act (which will short be on the Statute Book) on the agreement in question cannot be precisely formulated at this juncture. Somet ago, when the possibility of certain anomalies arising i connection with this agreement was pointed out to the Central Government, they said that no specific provision could be made in the Andhra State Bill for such individu agreements or specific contracts, and that bilateral agreements between Madras and Mysore or Andhra and Mysor may be concluded with a view to varying the terms if necessary.

3) With the passing of Bellary territory to Mysore the responsibility for supplying power to that area will

will be transferred to Mysore unless and until the future Andhra Government continues to supply power to these areas out of the block of 4,000 K.W. of power. At the same time, the liability of Mysore Government to supply 4,000 K.W. of power to Andhra Government seems also to continue. This would mean that Mysore Government would have to put in an additional block of power required for Bellary area and Tungabhadra project without a corresponding reduction in the block of power supply to Andhra State. This will not be an equitable state of things. Arrangements will therefore have to be evolved by which, on and after 1-10-1953, only that block of power, out of 4,000 K.W., which is being used in the Andhra area ~~be~~ is transmitted to them from Bellary or from such convenient Sub-Station, and the balance ~~be reduced~~ is deducted from the agreed power block in order to enable Mysore to supply it both to the transferred territory and to the Tungabhadra Project. The present transmission system in Bellary area can be integrated with the Mysore system, and a Sub-Station located at Bellary or near the ~~Bellary~~ Andhra border from which the balance of power due to Andhra can be supplied. Mysore could supply power direct to the Tungabhadra Project according to the arrangements now in force.

4) It is necessary to enter into negotiations with the Government of Madras well before the appointed day in order to effect necessary changes in the agreement. It is for consideration if the Madras Government be addressed in this behalf and the Chief Electrical Engineer, Mysore, be deputed to Madras to meet his opposite number there and negotiate the necessary changes. If necessary, a meeting at Secretariat or Governmental level may also be held in the middle of

of next month (September)', or, in the alternative, as there is going to be a High Level Conference again on Tungabhadra Project at Delhi about the same time (as intimated by the Ministry of Irrigation and Power yesterday), that opportunity may be availed of for bilateral discussions with the Madras Government.

Chief Minister

11) The telegram from G O is for perusal.
We are in correspondence separately with Madras regarding the arrangement to be made at Bellary. Madras Govt. have not so far written to us asking us for the switching of the station. ~~We~~ This and other allied matters are details to be discussed between the Concerned Chief Electrical Engineers, and it is not clear why the G O is interesting themselves in the matter. Why they are asking us to

some particular aspect of the question.

No action on telegram appears called for

Law Secy.)

21) It is seen from the preamble to the Agreement (dt 1-11-56) that the supply of power was for the purpose of distribution by the consumer in the ceded Districts; Since a part of the said ceded Districts has to merge with the territory of State of Mysore, the need for supply from it reduced pro-rata thereby and it would be just for the Mysore State to urge for revision of the agreement. The Advocate General may also be consulted

24) Para 2 of the preamble to the agreement (Flag 7) no doubt mentions that the furnishing of electrical energy by the Mysore Government to the Madras Government is "for the purpose of distribution by the Consumer in the Ceded Districts and for any other purposes for which the Consumer may require such energy." This would indicate that the Consumer, i.e., the Madras Government need not confine the distribution of the energy to the Ceded Districts. But, the primary purpose of the agreement can undoubtedly be said to be the distribution of the energy in the Ceded Districts. In actual practice also, it is seen from the file that the energy is being distributed exclusively in that area. I take it that, after the merger of the Bellary District in the Mysore State, the Madras State Government cannot, as of right, undertake the distn or carry on the distribution of electrical energy in the Mysore State. It would, therefore, be reasonable to ask that Government to release back a proportionate part of the quantity covered by the agreement.

25) It appears to me to be a matter for entering into a modified agreement after friendly discussion on the above.

SECRETARIAT GOVERNMENT 5627 17 SEP 1953 LAW DEPARTMENT

Serial No.

26) I have had discussions on this question at
Delhi on 9.10.1961 with Sri B.R. Somayajulu,
Special Officer for Andhra Electricity department
and Chief Engineer designate, Andhra Electricity dept.,
in the presence of the Chief Electrical Engineer
and Sri Venkapathi Rao, Special Officer, Bellary.

27) It was agreed that arrangements may be made
as soon as possible for shifting of the metering
equipment from Solapur to Bellary and
that in case of urgent pressing up
another metering station at Bellary for purposes of
Andhra units be met by Madras.

28) It was also agreed that the block of
power now being supplied to areas in transferred
territory and only this supplies, such as
Kolhapur, Hubli Hospet, Belgaum, Nagpur
Nasik, Miraj and Karaparambalu etc., would be
made over even that now being supplied to
the Tungabhadra project on the Madras side,
amounting to about 125 MW, would
be released to Mysore for arranging supply to
their places under Mysore auspices, as and from
1.10.53 and agreed to

29) and agreed that the block of power
now being supplied to Hyderabad for the execution
of the Tungabhadra Project on the left Bank
and amounting to about 550 MW, it was
contended by Sri Somayajulu that this was

Serial No.

No Government or part of Madras after the supply with power to Hyderabad as per contract terminated on June 1952 and notice had already been given by Madras to Hyderabad to effect that power supply, which was being continued even after June 1952 as a matter of grace and concession, would be cut off from 1.10.53. He was informed that it would not be right to cut off power supply to the Hyderabad system like that and that direct supply could be made by Mysore by entering into means of separate agreement to be entered into between Mysore and Hyderabad that power supply would have to be continued only for block of 4000 kW of power agreed by Mysore to Madras under the Agreement. This was agreed to by the Chief Engineer but it was pointed by him that at present a quantity of about 3200 or 3300 kW of power is being drawn at Yerraguntla at present by Madras and this would rise to a balance of about 7 to 8000 kW out of the power agreed by Mysore, it would be possible for Mysore to meet the requirement of Hyderabad out of the unutilised portion of the power agreed to Madras under the Agreement.

30) It was next urged by the Chief Engineer that a firm figure for the maximum quantity of power that would be released to Andhra at Bellary under the Agreement on and after 1.10.53 would have to be

Serial No.

estimates. There immediately was that he could not agree with the plans for the utilisation of West power as was being contemplated. He was not in which arrived at with from time, all agreement would have to be taken of the present consumption in the transferred territory and in Andhra area and of the capacity available to be set apart for their development in the near future say 4000 KW. Thereafter he was also willing that it could not be agreed that the entire balance after say 4000 KW after deducting the present consumption in the transferred territory would be of right belong to Andhra as that entire balance is not now there, which is in Andhra area. Suppose one enquiries would be made of the State Govt, the State say 4000 KW would have to be divided between the Transferred Territory and Andhra more or less in the proportion of present consumption. The Secretary also said that this would not be fair to Andhra as the area in transferred territory had been developed almost fully whereas the other area has not. He was also willing about 2500 KW for Andhra as they were not to be more than fair, considering that the proportion would be about 2300 KW, and that in any case, the CE Mysore would inform him by 8.10.53 about the maximum block that could be

N o t e.

Subject: Power supply to the Government of Andhra.

63) An agreement was entered into with the Composite State of Madras on 1st September 1947 for the supply 4000 K.W. of power for the purposes of distribution in the Ceded Districts. This agreement was for a period of 8 years from the date of commencement of supply of electrical energy under the agreement. By mutual agreement a supplemental agreement was also entered into on the 7th March 1951 between the two Governments for the commencement of this power supply from the 7th June 1949 instead of from 1st January 1949 as specified in the original agreement. In accordance with this agreement, 4000 K.W. of power was delivered at Sokke by the Mysore Electrical Department. The period of the Agreement will ~~since~~ expire on 7th June 1957.

Consequent on the merger of seven taluks of Bellary with Mysore with effect from 1st October 1953, part of the power supply under the Agreement got transferred to Andhra Government. Under this allocation, the Government of Andhra are now receiving power to the extent of about 2000 K.W.

164) Sometime last year, a request was made by the Government of Andhra for an additional supply of 2500 K.W. until the Tungabhadra Project was commissioned. After some discussions, they were informed that Mysore was not in a position to supply any additional power as the State itself was in need of all the power generated inside it. Within the last few weeks, the Government of Andhra again asked for temporary supply of 500 K.W. for a period of about two months until the end of January 1957, on condition

of their supplying an identical quantity of power to Mysore from the Andhra share of the Tungabhadra power ~~if~~, after January 1957, if needed by Mysore. This has been agreed to. It will ~~be~~ thus be seen that the power supply to Andhra according to present arrangements will terminate by the middle of next year. It is not proposed to continue the supply as Mysore itself ~~would~~ will be in need of the power so released. The Chief Electrical Engineer has already indicated to the Chief Electrical Engineer, Andhra, that power supply to Andhra cannot be continued beyond June 1957.

Power supply to the Govt.

P.W. & Elec. Dept.

(Sec (Elec))

Secy to Govt of Andhra Pradesh
P.W.D.
Hyderabad (Secunderabad)

To

The Secretary to the Government of Madras,
Public Works Department
Fort St.George, Madras.

Sir,

Sub: Supply of power to the Ceded Districts.

- - -

I am directed to state that an agreement was entered into between Mysore and Madras on 1st September 1947 according to which the Government of Mysore ~~offered to~~ have been supplying 4000 K.W. of power in bulk to Madras for the purpose of consumption in the Ceded Districts ~~that this power supply appears to have commenced~~ in the year 1949 and the agreement is due to be terminated in the year 1957, ~~being in force for a period of 8 years only~~.

2. ~~I am to state that~~ 7 taluks of Bellary District which are proposed to be transferred to Mysore State from the 1st October 1953 ~~form part of the~~ and also for purposes of Tungabhadra Project Ceded Districts for which the abovementioned power supply was intended, that the Government of Madras are at present taking this power in bulk at Sokke, ~~(a village in Chitaldrug District close to the Bellary Border)~~ and distributing the power by means of their own transmission line and a portion of the power to Tunghabhadra Project both in Madras and Hyderabad territories.

3. ~~As the Government of Mysore will have~~ to supply electric power to the 7 taluks of Bellary District ~~which are to be transferred to Mysore~~ State

and unless and until the future Andhra Government continues to supply power to these areas out of the block of 4,000 K.W. of power, the liability of the Government of Mysore to supply 4,000 K.W. of power to Andhra Government will continue. This would mean that the Government of Mysore would have to put in an additional block power required for Bellary area and Tungabhadra Project without a corresponding reduction in the block of power supply to Andhra State. This will not be an equitable state of things.

3. In order to arrive at an arrangement before the 1st October, I am to state that it will be desirable that this question is discussed at a meeting with the representatives of the Government of Madras. The date and the venue for the meeting may kindly be intimated very early.

Yours faithfully,

Secretary to Government
Electrical Department

Copy to CEE
Copy to the Officer (Bellary).

GOVERNMENT OF MYSORE

The Secretary to the Government of Madras,
Public Works Department,
Fort St.George,
MADRAS.

Sir,

Subject: Supply of power to the Ceded Districts.

- - -

I am directed to state that an agreement was entered into betw Mysore and Madras on 1st September 1947 according to which the Gover of Mysore have been supplying 4000 KW of power in bulk to Madras for purpose of consumption in the Ceded Districts.

2. A portion of this power is now being utilised in the 7 talu of Bellary District which are proposed to be transferred to Mysore S from the 1st October 1953 and also for purposes of the Tungabhadra P

3. With the transfer of territory the entire supply and distril of power in the transferred territory (including the supply now bein to the Tungabhadra Project) will have to be taken over by Mysore and the foll arrangements have to be made for that purpose:

(i) The sub-station at Sokke from which power is now deliv to Madras will have to be shifted to some place nea Andhra border to be agreed upon between the Chief Electrical engineers of Mysore and Madras;

(ii) The quantity of power to be delivered at such place t Andhra under the agreement will be reduced by the quantity now consumed in the transferred territory (including Tungabhadra Project), so that, that powe may be made available to Mysore for distribution in said area.

4. It is proposed to post our officers to Bellary by 15th Sep 1953 so as to enable them to acquaint themselves with the system and ake over on 1st October 1953. It is therefore imperative that detai n pursuance of the above arrangements will have to be worked out by 5th September 1953.

5. A discussion may if considered necessary be arranged between the concerned Chief Electrical Engineers either here or at Bellary. I am to request that urgent action may be taken in this behalf and the date and place of such meeting as may be proposed intimated immediately, by telegram if possible.

The Secretary to the Government of Madras,
Public Works Department,
Fort St.George,
MADRAS.

Subject: Supply of power to the Ceded Districts.

- - -

I am directed to state that an agreement was entered into between Mysore and Madras on 1st September 1947 according to which the Government of Mysore have been supplying 4000 KW of power in bulk to Madras for the purpose of consumption in the Ceded Districts.

2. A portion of this power is now being utilised in the 7 taluks of Bellary District which are proposed to be transferred to Mysore State on the 1st October 1953 and also for purposes of the Tungabhadra Project.

3. With the transfer of territory the entire supply and distribution of power in the transferred territory (including the supply now being made to the Tungabhadra Project) will have to be taken over by Mysore and the following arrangements have to be made for that purpose:

(i) The sub-station at Sokke from which power is now delivered to Madras will have to be shifted to some place near the Andhra border to be agreed upon between the Chief Electrical Engineers of Mysore and Madras;

(ii) The quantity of power to be delivered at such place to Andhra under the agreement will be reduced by the quantity now consumed in the transferred territory (including Tungabhadra Project), so that, that power may be made available to Mysore for distribution in the said area.

4. It is proposed to post our officers to Bellary by 15th September 53 so as to enable them to acquaint themselves with the system and to take over on 1st October 1953. It is therefore imperative that details in pursuance of the above arrangements will have to be worked out by 15th September 1953.

5. A discussion may if considered necessary be arranged between the concerned Chief Electrical Engineers either here or at Bellary. I am to request that urgent action may be taken in this behalf and the date and place of such meeting as may be proposed intimated immediately, by telegram if possible.

Yours faithfully,

Sd. (D.K.Srinivasachar)
Secretary to Government
Electrical Department

Dear Sri Somayajulu,

Transferring the Metering Equipment from Sokke to Bellary.

I write to request that preliminary arrangements be kindly made (as agreed to by you while I was at Madras) for laying the foundation for the metering cubicle which has to be transferred from Sokke to Bellary. The exact location of the metering cubicle may be so fixed as to cause the least interference with the proposed structures that would come up in the Bellary Sub-Station. If you can also arrange for the transport of the metering equipment when dismantled, I shall feel grateful.

Thanking you,

Yours sincerely,

Sd.-G.Chandy

(G.Chandy)

Sub:- Transferring the metering equipment from Sokke to Bellary.

I thank you for your D.O.of 3.9.53. As desired, I will arrange for the foundations and supports for your 66-kV.metering equipment to be shifted from Sokke to Bellary. Interference with the future extensions to the Bellary sub-station structures will be eliminated to the extent feasible.

2. I will be sending you a sketch of the arrangements shortly.

3. In respect of transport of the equipment from Sokke to Bellary on or about 1.10.53, I regret I cannot undertake this since all our transport is engaged in Kurnool, the new Capital. I therefore suggest that you make the necessary transport arrangements to transfer your metering equipment from Sokke to Bellary.

Thanking you,

No.D.O.S.O.(Camp) .19... 8th September, 1953.

My Dear Srinivasachar,

As one of the points to be discussed by our Chief Minister with the Chief Minister of Madras on the 14th instant would perhaps be that of the revision of the Agreement regarding the supply of electric power to Madras, consequent on the transfer of the 7 taluks of Bellary District to Mysore, I suggest your kindly making a Note and sending it to the Secretary to the Chief Minister as also a copy to me and the Chief Secretary before the 12th instant. I am making a Note in regard to the other points for submission to the Chief Minister

Thanking you and with kind regards,

Yours sincerely,

K. Seshagiri Rao

An Agreement was entered into with the Govt. of Madras in September 1947 for the supply of 4000 KW. of power at Sokke near Bellary ~~to the Ceded District~~ for use there. Power supply commenced in the year 1949 and the agreement is due to terminate in the year 1957, being in force for a period of 8 years.

As Taluks of Bellary will be transferred to the Govt. of Mysore, with effect from 1/10/1953, the power required by these Taluks will have to be supplied by this Govt. As this

part of the Ceded Dt.
for which the Govt. of
Madras had taken
6000 Kw of power, the
Govt. of Madras have
been addressed on 4/5
re: the reduction of the
block of 6000 Kw to the
extent required for
distribution in the Ceded

Electrical Department

SUPPLY OF POWER TO CEDED DISTRICTS

An agfeement was entered into between Mysore and Madras on 1-9-47 according to which Mysore Government offered to supply 4000 K.W. of power in bulk to Madras for purposes of consumption in the Ceded Districts. Supply of power under this agreement has commenced in 1949 and the agreement is for a period of 8 years therefrom. The power is being delivered to Madras by Mysore at a place called Sokke near the Chitaldrug-Bellary border and is being transmitted and distributed by Madras in the Ceded Districts, namely Bellary, Anantapur, Kurnool, etc. A portion of the power is also being utilised in connection with the construction of the Tungabhadra Project and a quantity of about 600 is being sold by Madras to Hyderabad for the purpose of construction of the Hyderabad portion of the project

With the merger of seven taluks of Bellary with Mysore, the responsibility for supplying power to these taluks and even to the Tungabhadra Project which will be located in Mysore territory will be that of Mysore. The agreement with Madras, however stipulates supply of 4000 K.W. and this agreement becomes an agreement with Andhra on and after 1-10-53. Since a portion of the power is being utilised in the seven taluks of Bellary it is proper that on and after 1-10-53, the quantity of power now being utilised in the transferred territor should be deducted from the supply to Andhra and only the balance delivered to that State.

The Government of Madras have accordingly been addressed in the matter of (1) shifting ~~of~~ the metering equipment from Sokke to a point near the future Mysore-Andhra Border to be determined by the concerned Chief

Electrical Engineers, (2) delivering at that point to Andh 4000 K.W. minus the quantity now being distributed in the transferred territory (including Tungabhadra Projec so that the quantity so deducted may be employed by Mys for purposes of supply in the merging area and Tungabha Project. The final reply from the Government of Madras is awaited. The Chief Electrical Engineer, Madras has arranged a meeting with our Chief Electrical Engineer at Bellary on the 12th and 13th for detailed discussion on this question.

These arrangements are incidental to the transfe territory and have to be agreed upon between Mysore and Madras well before the date of transfer.

Another point which may be taken up with the Government of Madras is the arrangement to be made for handing over the administration of the Electrical Depar in the transferred territory. Orders have been passed about the posting of one First Grade Superintendent and 2 Assistant Superintendents to Bellary and to their bei placed on special duty from 15-9-53 to enable them to proceed to Bellary and acquaint themselves with the nature of the work and with the arrangements to be made for taking over. Facilities have got to be provided by the Government of Madras to these officers from 15-9 in the matter of transfer of the administration of the department.

Bangalore-1, 28 September 1953.
(Mysore, S. India)

GENERAL & REVENUE SECRETARIAT 2954 29 SEP 1953 ELECTRICAL BRANCH

SECRETARY TO GOVERNMENT Date... PUBLIC WORKS & ELEC DEPTT.

The Secretary to Government,
Electrical Department,
B a n g a l o r e.

S i r,

Subject:- Supply of power to the Ceded Districts.

With reference to your letter No.EDS.2626/Elecl.258-53-7 dated the 26th instant, on the above subject, I write to inform you that the metering equipment at Sokke was dismantled on Sunday the 27th instant and is on its way to Bellary. It is proposed to connect the metering equipment on the 30th instant itself, to enable us to take the meter readings from the 1st October 53. The Special Officer for Andhra Electricity Department and the Chief Engineer designate for Andhra Electricity Department stated that the pedestal for installing the metering equipment would be got up by the Govt. of Madras. We might have to meet small charges in this connection towards stranded copper wire or copper tubing etc. The charges for transporting the metering equipment from Sokke to Bellary and re-installing it at Bellary have also to be borne by us.

As regards the block of power to be supplied to the Ceded Districts from 1st October 1953 onwards, the figure can be arrived at after the meters for the Andhra area are installed and their readings taken. This will be in the same proportion as the readings obtained between the territory transferred to Mysore and Andhra, reduced to 4000-kW.basis, as their present demands would be lower than 4000-kWs. as the ginning season is not in operation at present. The status quo for the existing arrangements for power would continue to Andhra also, allowing them an increase up to 10% if necessary.

As far as power supply to the Hyderabad portion of the Tungabhadra Project is concerned, it can be measured after the 1st October 1953 and a separate agreement entered into with the Hyderabad Government.

In case Andhra Government requires a little more power, can enter into a separate agreement with Andhra for the tra block of power, charging them rates as per the agreent with South Canara. It can be agreed to be given only the specific understanding that they would have to relinish the load or stagger it, so that the total block of powe ll not exceed the block of power due to them under the exis g contract from 1st January 1956. The Chief Engineer, Andl ould also agree to instal synchronous condensers at the dif rent places so as to improve the regulation of the line before e extra power could be given.

Yours faithfully,

28/3

I am directed to state that the matter may kindly be taken up with the Andhra Government after 1-10-19

Yours faithfully,

A.J.Chandy

(A.J.CHANDY),
for Secretary to Governme

Copy of D.O.No.1312-G/53-1 received from the Chief Egineer for Electricity, Govt. Electricity Department, 157 Mount Road, Madras dared 3rd October 1953 to Sri G.Chandy, Chief Elcl. Engineer, Govt of Mysore, Bangalore.

Ref. Your telegram dated 1-10-53 and also post copy No.CEE 33695-6 Dated 1-10-1953.

It is understood that as per the agreement arrived at a conference in Delhi regarding the Tungabhadra Project, the substations at Hosept (Damsite substation) and Bellary and the main transmission line betwwn these two stations will be maintained by the Tungabhadra Board. Accordingly these have been handed over to the Superintending Engineer, Tundabhadra Project. I am not aware of the exact details of the agreement arrived at Delhi as I did not attend the conference. I am requesting Mr Somayajulu who was present at the conference to intimate to you further the details of the agreements and also the position regarding the - handing over of the substations and lines referred to above.

A NOTE ON THE TAKING OVER OF THE ELECTRICITY SYSTEM IN THE TRANSFERRED TERRITORY.

The Government of Mysore entered into an agreement with t Government of Madras for the supply of power upto 4000 K.W. to the Ceded Districts and this was arranged commencing 1949 at S which was at the frontier line between Mysore and Madras durin that period. The consumption of electrical energy was metered Sokke by Mysore and billed to the Madras Government. The Mad Government extended the 66 kV. transmission line from Ujjani i then Madras State (adjacent to Sokke) to Hospet and on to Boll Guntakal, etc. A temporary sub-station was installed by the Madras Government at the Tungabhadra Dam site to supply power the town of Hospet and also for the construction work for both Madras and Hyderabad portions of the T.B.Dam. Another sub-st was installed at Bellary to supply power to the Bellary town a beyond to Guntakal, Adoni, Royadrug, etc. These construction were undertaken under the Ceded Districts Scheme which is stat be conceived as a portion of the T.B.Scheme and fitting in wit same. With the transfer of the 7 Taluks in the Bellary Distri Mysore as from the 1st October 1953, the transmission lines be Sokke-T.B.Dam site-Bellary and the sub-stations at the T.B.Dam and at Bellary come within the Mysore territory and should rig belong to Mysore being part of the assets taken over.

As per interpretation of the Madras Government of Clause Para 5 of the Andhra States Bill, any works which have a commor bearing to more than one State should come within the jurisdict of the Tungabhadra Board which was constituted as from 1st Octo 1953. When handing over the electricity system of the transfe territory by the Government of Madras, the Chief Engineer for Electricity to the Govt.of Madras issued instructions to the Su intending Engineer, Royalaseema Power System, Bellary, to hand the T.B.Dam Sub-station (fully) and Bellary sub-station (partly the Tornagallu Switching Station (fully) to the Superintending Engineer, T.B.Hydro-Electric Scheme on behalf of the T.B.Power in addition to the interconnecting 66 kV. transmission and tele

line and equipment between the T.B.Dam sub-station and Bellary; the Sokke sub-station, Kudligi sub-station, the 66 kV.transmission and telephone line and equipment between Sokke and the T.B.Dam sub-station (excluding the T.B.Dam sub-station) to be handed over to the Mysore representative. The distribution lines and the distribution at Hospet and Bellary including the Hagari, Paramadevanahalli transmission and distribution system were also asked to be taken over by the Mysore representative.

But the interpretation that Mysore puts forth is that the entire transmission and distribution in the transferred ar comprising the 7 Taluks is the asset of Mysore; and if transmission and distribution is to be effected by the Board, this can only be after generation of power from the T.B.Project commences, which it is not doing at present. This means that th sub-stations at the T.B.Dam site, at Bellary and the switching station at Tornagallu along with the 66 kV. transmission and telephone line between Sokke-T.B.Dam site-Bellary rightfully should belong and should be operated by the Mysore Government.

As agreed to by the Special Officer for Andhra for Electr city, prior to 1st October 1953 the metering equipment at Sokk was shifted by the Government of Mysore from this location and installed at the Bellary sub-station to measure energy consume by Andhra. This change was effected in consultation with the Madras Government and therefore it is evident that there was n intention for Mysore to sell power to any other party than Andh The position of the Mysore Government of selling power to the Board at the T.B.Dam site and at Bellary and buying it back for retail distribution to consumers at Hospet and at Bellary in it own territory is anamolous. It is stressed that dual or tripartite ownership and control of the sub-station will be an absolutely unworkable and inefficient situation and liable to b fraught with consequences that may endanger life of operating personnel.

The only rational method of overcoming the present anamolous situation is, as already stated above, for Mysore to own and operate the existing transmission lines, sub-stations, etc., in its territory, and to sell power to the Board at the T.B.Dam site for completion of the Tungabhadra Project and to Andhra at the Bellary sub-station as per terms of the agreement which Mysore has entered into for supply of power to the Ceded Districts Scheme with Madras, but with slight modifications.

A note on the handing over of charge of the system to the Division Electrical Engineer, Bellary, and a sketch of the existing layout are enclosed. The matter should be dealt with at State level and brought up for discussion and solution at the first meeting of the Board.

NOTE ON HANDING OVER ELECTRICITY DEPARTMENTS WORKS AND STAFF IN SEVEN TALUKS OF BELLARY DISTRICT TO MYSORE STATE AND TUNGABHADRA POWER BOARD.

.. ..

As per orders issued to me the works in the seven taluks of Bellary district which are to merge with Mysore State on 1-10-53 are to be handed over as follows:-

1. The Tungabhadra Dam substation fully (Temporary) the Bellary sub-station (Partly) and the Torngallu switching station (in full) are to be handed over to Sri Narasimha Rao Superintending Engineer, Tungabhadra Hydro Electric Scheme on behalf of the Tungabhadra Power Board. The interconnecting 66 KV line and telephone line and equipments are also to be handed over to the T.B. Power Board.

2. Sokke Station, Kudligi Sub-station, the 66 KV line and telephone line and equipment from Sokke to T.B.Dam but excluding T.B.Dam S.S. are to be handed over to Mysore. The 11 KV lines from Kudligi S.S. to Kottur, Kudligi town and Hagari Bommanahalli the distributions at the above 3 places the 11 KV line from Bellary to Hagari Paramedevanahalli and the distributions therein, the distribution in Bellary town, and the 11 KV lines from T.B. Dam S.S. to Hospet town and Amaravathy and the distributions at Hospet and Amaravathy are to be handed over to Mysore State.

3. The Divisional Electrical Engineer Bellary, A.E.E. Hospet and A.E.E. Bellary will look after the area and equipment handed over to Mysore State on behalf of that state. They will cease to have control over the equipment area and line transferred to the Board.

The J.E.O. Bellary and J.E.O. Damsite will go under the control of the Board.

The O.S.C. Staff at the respective places are to be handed over to T.P. Power Board and Mysore respectively except that a portion of the staff has to be handed over to the other authority whose lines are feeding or radiating from Bellary S.S.

Thus one lineman and two helpers are retained by the Andhra State out of the staff at Bellary S.S. for patrolling of the 33 KV Power and telephone line to Alur, the 66 KV power and telephone line to Guntakal and the 11 KV line to Rayadrug and one F type and 3 G type quarters in Bellary S.S. one Nissen shed are retained by the Andhra State (Vide annexure) with right of entry into and all normal use of the buildings and appurtenances by the above persons and officers or Rayalaseema Power system.

Further details are added below, with annexures detailing the nature and extent of Handing over. These annexures indicate to which party the handing over is hereby made.

LINES:- A route map showing the disposition of the 66KV, 33KV and 11KV lines lying in this area is enclosed. The length of the lines transferred are as shown below.

(a) 66 KV line:- 1, Sokke to T;B. Dam 42 miles
(b) 66 KV line:- T.B.Dam to Bellary 41 miles

11 KV lines:- 1 Kudligi to Kottur.
2. Kudligi to Hagari Bommanahalli

Item (a) is handed over to Mysore and item (b) to T.B. Power Board.

The Bellary Adoni 33 KV line will be owned and maintained by the Andhra State, 15.10 miles of this line will lie within the Bellary Taluk. Similarly the Bellary Guntakal 66 KV line and the Bellary Rayadrug 33/11 KV line will be owned and maintained by the Andhra State. Fifteen miles of the Guntakal line and 10-4 miles of the Rayadrug line lie within the Bellary Taluk.

A key diagram of the lines and substations from Sokke to Bellary is also enclosed.

Sub-stations:- The following are the important sub-stations lying in the 7 taluks.

1. Sokke switching station
2. Kudligi S.S.
3. T.B. Dam S.S.
4. Tornagallu Switching Structure
5. Bellary S.S.

The details of the major equipments in the various sub-stations are enclosed in the attached table.

Distributions:- The following distributions come within the area going over to Mysore.

1.Bellary dist.
2. P.D.Halli, T.B.Halli and rural distribution.
3. Kottur distribution.
4. Kudligi distribution.
5.Hagari Bommanahalli distn.
6. Hospet distribution.
7. Amaravati distribution.
8. Sandur distribution and Power House.

Telephone lines:- A complete schematic layout of the telephone lines is enclosed in the attached sketch. The installations at Sokke and Kudligi and handed over to Mysore and those at T.B. Dam Tornagallu and Bellary S.S. (incoming tunnel and panal mounted phone only) are handed over to the Power Board. The panels and one panel mounted telephone instrument of and for all the out going telephone lines are retained under the control of Andhra state with full rights of free access and normal and bonafide use by any staff of the Andhra state, in consultation with the shift Staff of T.B.Power Board. All the outgoing telephone pannels at Bellary and the outgoing telephone lines will be owned and manned by the Andhra State.

Operational facilities:- As the operation and maintenance of the power and telephone lines going to Andhra State from Bellary S.S. will have to be looked after by the Andhra state, it will be necessary for the concerned staff to operate within the sub-station. Suitable facilities for the same and also quarters for these people are retained by the Andhra state.

Quarters:- One lineman two hompers and 1 F type quarters and 3 G type quarters and one Nissen shed are retained in the control of Andhra state. One of the 3 G type quarters being for keeping the "tackle and tools" of the Andhra state. The rest of quarters and buildings and appertenances there to are handed over to T.B. Power Board. The handing over is subject to the staff of the Andhra state retaining their right for all the amenenities now being enjoyed by them such as electric supply and free sanitation and water supply.

There are in the Bellary S.S.

1. One block of Asst. Engineers quarters.
2. One block of Single F type quarters.
3. Two blocks of 2 F type quarters.
4. One block of single F type quarters. (for Andhra)
5. Five blocks of 2 G type quarters.
6. One Asst. Engineers office.
7. One store and telephone room.
8. One garage.

METERING:- The metering arrangement at Bellary S.S. has already been discussed by the Chief Engineers of the two states. The arrangement will be generally as shown in sketch annexure No. The consumption of the Andhra State will be arrived at by metering THE TOTAL incoming energy at 66 KV at Bellary S.S. and subtracting from it the consumption of
1. The Bellary town and Vagari 11 KV loads and
2. The substation consumption by L.T.metering at the sub-station transformer.

FILES~~X~~ Etc., :- Lists of files, records papers, and pending papers pertaining to 1. Bellary 2. Hospet and 3. Sandur are enclosed.

Sandur:- The supply to this town is from an oil engine Power House. The details of the entires installed at this power ho are detailed below.

1. One No.43.75 KV A Gardner set.
2. One no. 27.5 KVA Laxman set.
3. One No. 36 HP Crossley set.
4. Besides this there is a 40 KW Blackstone D.C. General r set (with a cracked crank shaft which has been taken to T.B. Project for attempting welding up and repainting the crank shaft. The crank shaft has to brought back to Sandur (as the T.B. Project does not seem to be likely to progress with the job in the near future) if not already done.

ACCOUNT NOS:- The Capital outlay for the various lines and sub-stations are maintained separately and under various account Nos. these are furnished below:-

1. Lines:-

CD. 400 Sokke T.B. Dam 66 KV line
CD.401 T.B. Dam, Bellary 66 KV line
CD.861-B T.B. Dam-Hospet 11 KV line
CD.861-A. Kudligi-H.B. Halli 11 KV line
CD.861-C Bellary Vagari 11 KV line.
Cd. 500 Sokki. T.B.Dam telephone line.
CD. 510 T.B. Dam-Bellary. "

To

The Secretary to Government,
Public Works Department,
Andhra State,
Kurnool

Sir,

Subject:- Supply of power to Ceded Districts.

I am directed to invite attention to the correspondence on the above subject between this Government and the Government of Madras which took place prior to 1-10-1953. In his last letter dated 28-9-1953, the P.W.Secretary, Madras, has written to say that this Government may address the Government of Andhra in the matter.

In my letter of 4th September 1953 sent to the P.W.Secretary, Madras Government (copy enclosed for reference), it was stated that on and after 1-10-1953, the supply and distribution of power within the transferred territory (including the Tungabhadra Project) would vest in Mysore and that a certain proportion of power out of the 4000 K.W. originally contracted to be supplied to Madras would be supplied to Andhra from that date, at an agreed point at the Andhra border, for use in Andhra territory. It may be pointed out in this connection that though the Ceded Districts Power Agreement formerly entered into with Madras could not be implemented after 1-10-1953 in the manner originally contemplated owing to circumstances beyond the control of any of the States concerned, this Government did not desire that power supply to the places served under the Agreement should be discontinued after

that date, and therefore made the above suggestion purely in a spirit of co-operation and helpfulness. No specific reply was received to the said letter and it was merely stated that the Chief Electrical Engineer of Madras was being asked to contact the Chief Electrical Engineer of Mysore for discussions. These discussions did take place at Bellary, and when Sri Somayajulu, then Special Officer and now Chief Electrical Engineer, Andhra, was at Delhi on the 19th September 1953, there were also further talks held. This Government understood that even these discussions dealt with the two main points already referred to, viz. (1) the arrangements for supply of power in the transferred territory on and after 1-10-1953 and (2) the quantum of power to be supplied at the Andhra border for consumption by and in Andhra State. With regard to the former, it was unequivocally stated on behalf of Mysore that the entire distribution system within the transferred territory (including Tungabhadra Project on both the banks) should be with Mysore and that power, whose proportion was to be worked out, could be supplied at the Andhra border by Mysore after having the metering equipment at Sokke shifted to an agreed place. The proportion of power, it was indicated, would be roughly the same as that of the consumption in Andhra territory at the time of transfer of territory to the total draw of power at Sokke at that time, and was to be worked out precisely shortly after the appointed day, in order to enable the Mysore

Electricity Department to take account of the consumption both in the transferred territory and in Andhra. Sri Somayajulu was, it is reported, requested to confirm this arrangemen through the P.W.Secretary, Madras, but no confirmation has come so far.

It is now reported by the Chief Electrica Engineer, Mysore, that while effecting the handing over of the assets of the Electrical Department in the transferred territory to Mysc in pursuance of the transfer of territory on 1-10-1953, the Electricity Department of Madra have handed over only some portions thereof (a copy of the note on handing over which appea to have been prepared by the Madras Officers is enclosed). It would appear therefrom that the Madras Electricity Department have sought to transfer some portions of the assets, installations etc. in the transferred territory to th Tungabhadra Board and some to the representativ of the Government of Andhra.

The Government of Mysore are unable to understand the basis for this action on the part of the Madras Electricity Department. There can be no doubt that on and after 1-10-19 the entire assets, effects, installations etc. of the Electricity Department in the transferre territory have come over to Mysore and, in the process of the formal transfer of such assets etc. no part of those assets, wherever situate within the transferred territory, can be handed over to the control of any authority other than Mysore State. This Government are advised that the Tungabhadra Board can have no manner of

interest or concern in these assets and installations. Indeed, the Madras Government was supplying to the Tungabhadra Project a part of the power that the Madras Government was getting under its agreement with the Mysore Government, and it would be for the Mysore Government, after taking charge of the installations, to arrive at an appropriate arrangement with the Board. The rationale of the proposal to hand over to Andhra the transmission lines from Bellary to Adoni, Rayadrug and Guntakal running within the l: of Bellary District is also not explained. Government of Mysore have for reference a c of a letter from the Chief Electrical Engir Madras, addressed to the Chief Electrical Engineer, Mysore, on the 3rd October (copy enclosed) which purports to say that it was agreed on behalf of Mysore that Hospet and Bellary sub-stations together with the line between them should be handed over to the Tungabhadra Board. I am to state categoric that the statement in this letter is entire unfounded and seems to be based on a miscon On the contrary, the discussions proceeded along, as pointed out earlier in this letter, the basis that service and distribution in transferred territory should, without any ki of exception, be the sole concern and under exclusive control of Mysore State on and af 1-10-1953.

I am, therfore, to request that immedi arrangements be made for the handing over o

of control, to the representatives of Mysore, of such effects, assets and installations etc. of the Electricity Department in the transferre territory (including the stations, transmission lines, buildings etc.) as were not handed over to Mysore on 1-10-1953. This has to be done at once as the arrangements which appear to hav been made by the Madras Electricity Department, are not only inappropriate and contrary to what was understood but are anomalous and defective.

~~I am to add that the abovementioned act~~ of the Madras Electricity Department without any kind of prior reference to or consultation with the Mysore Government has created a situat in which it is exceedingly difficult, if not impossible, for Mysore to continue the supply of power, even tentatively, to the several installations that were being served in Andhra territory up to 1-10-1953 without grave inconvenience to supplies in the transferred territory, which should be prevented at all cos I am to express the hope that the Government of Andhra would wish to do everything in their pow to avoid the development of such a serious ~~situation~~.

I am to request that the matter may be trea as emergent and an immediate reply sent.

Yours faithfully,

Secretary to Government
P.W. and Elec. Department

Copy to: EDS 2844-45 Dated 12th October 1

The Secretary to the Government of Madras P.W. Department for information.

The Chief Electrical Engineer in Mysore,

Bangalore for making immediate arrangements, in consultation with the Chief Electrical Engineer of Andhra and the Chairman of the Tungabhadra Board for taking over control of assets etc. of the Electricity Department of the transferred territory such as were not handed over on or after 1-10-1953 up to now.

Public Works Department, Andhra State,
KURNOOL

Sir,

Subject: Supply of power to Ceded Districts.

I am directed to invite attention to the correspondence on the above subject between this Government and the Government of Madras which took place prior to 1st October 1953. In his last letter dated 28th September 1953, the Public Works Secretary, Madras, has written to say that this Government may address the Government of Andhra in the matter.

In my letter of 4th September 1953 sent to the Public Works Secretary, Madras Government (copy enclosed for reference), it was stated that on and after 1st October 1953, the supply and distributio of power within the transferred territory (including the Tungabhadra Project) would vest in Mysore and that a certain proportion of power out of the 4000 K.W. originally contracted to be supplied to Madras would be supplied to Andhra from that date at an agreed point at the Andhra border, for use in Andhra territory. It may be pointed out in this connection that though the Ceded Districts Power Agreement formerly entered into with Madras could not be implemented after 1st October 1953 in the manner originally contemplated owing to circumstances beyond the control of any of the States concerned, this Government did not desire that power supply to the places served under the Agreement should be discontinued after that date, and therefore made the above suggestion purely in a spirit of co-operation and helpfulness. No specific reply was received to the said letter and it was merely stated that the Chief Electrical Engineer of Madras

was being asked to contact the Chief Electrical Engineer of Mysore for discussions. These discussions did take place at Bellary, and when Sri Somayajulu, then Special Officer and now Chief Electrical Engineer, Andhra, was at Delhi on the 19th September 1953, there were also further talks held. This Government understand that even those discussions dealt with the two main points already referred to, viz. (1) the arrangem for supply of power in the transferred territory on and after 1st October 1953 and (2) the quantum of power to be supplied a the Andhra border for consumption by and in Andhra State. Wit regard to the former, it was unequivocally stated on behalf of Mysore that the entire distribution system within the transfe territory (including Tungabhadra Project on both the banks) should be with Mysore; and with regard to the latter it was stated that power, whose proportion was to worked out, could be supplied at the Andhra border by Mysore after having the metering equipment at Sokke shifted to an app place. The proportion of power, it was indicated, would be roughly the same as that of the consumption in Andhra territor at the time of transfer of territory to the total draw of powe at Sokke at that time, and was to be worked out precisely shor after the appointed day, in order to enable the Mysore Electri Department to take account of the consumption both in the transferred territory and in Andhra. Sri Somayajulu was, it i reported, requested to confirm this arrangement through the Public Works Secretary, Madras, but no confirmation has come s far.

It is now reported by the Chief Electrical Engineer, Mys that while effecting the handing over of the assets of the Electrical Department in the transferred territory to Mysore i pursuance of the transfer of territory on 1st October 1953, th Electricity Department of Madras have handed over only some portions thereof (a copy of the note on handing over which appears to have been prepared by the Madras Officers is enclos

It would appear therefrom that the Madras Electricity Departme have sought to transfer some portions of the assets, installat etc. in the transferred territory to the Tungabhadra Board and some to the representatives of the Government of Andhra.

The Government of Mysore are unable to understand the basis for this action on the part of the Madras Electricity Department. There can be no doubt that on and after 1st Octob 1953 the entire assets, effects, installations etc. of the Electricity Department in the transferred territory have come over to Mysore and that, in the process of the formal transfer of such assets etc. no part of those assets, wherever situate within the transferred territory, can be handed over to the control of any authority other than Mysore State. This Government are advised that the Tungabhadra Board can have no manner of interest or concern in or jurisdiction over these assets and installation Indeed, the Madras Government was supplying to the Tungabhadra Project a part of the power that the Madras Government was getting under its agreement with the Mysore Government, and it would be for the Mysore Government, after taking charge of the installations, to arrive at an appropriate arrangement with th Board. The rationale of the proposal to hand over to Andhra t transmission lines from Bellary to Adoni, Rayadrug and Guntaka running within the limits of Bellary District is also not explained. The Government of Mysore have for reference a copy a letter from the Chief Electrical Engineer, Madras, addressed to the Chief Electrical Engineer, Mysore, on the 3rd October (enclosed) which purports to say that it was agreed on behalf o Mysore that Hospet and Bellary sub-stations together with the between them should be handed over to the Tungabhadra Board. am to state categorically that the statement in this letter is entirely unfounded and seems to be based on a misconception. On the contrary, the discussions proceeded all along, as point out earlier in this letter, on the basis that service and

distribution in the transferred territory should, without any kind of exception, be the sole concern and under the exclusiv control of Mysore State on and after 1st October 1953.

I am, therefore, to request that immediate arrangements be made for the handing over of control, to the representativ of Mysore, of such effects, assets and installations etc. of Electricity Department in the transferred territory (including the stations, transmission lines, buildings etc.) as were not handed over to Mysore on 1st October 1953. D. O. No. B675/ 1186-8

My dear Sundaram,

With reference to your D.O.No.13123-G/53-1 of the 3rd instant, I write to inform you that at the Conference at Delhi regarding the Tungabhadra Project, it was not agreed that the Sub-Stations at Hospet (Dam-site Sub-Station) and Bellary and the main transmission line between these two Stations would be maintained by the Tungabhadra Board. This question is being taken up at the first Board Meeting to be held at Tungabhadra shortly.

Yours sincerely,

Sd.- G. Chandy.

Shri G.Sundaram,
Chief Engineer for Electricity,
Govt.Electricity Department,
157, Mount Road, MADRAS.

COPY to Shri B.R.Somayajulu, Chief Engr.for Electricity, Andhra State, 20, Rutland Gate, II Nungampakkam, Madras, for information.

p.t.o.

forwarded to Sri D.K.Srinivasachar, Secretary to Government, Elecl.Dept., Bangalore, for information, with a copy of Sri G.Sundara letter under reference.

Copy of Sri G.Sundaram's letter of 3-10-53:-

Ref:- Your telegram d/1.10.53 and also post copy No.CEE.33695-6 dated 1.10.53.

It is understood that as per the agreeme arrived at a Conference in Delhi regarding th Tungabhadra Project, the substations at Hospe (Damsite substation) and Bellary and the main transmission line between these two stations will be maintained by the Tungabhadra Board. Accordingly these have been handed over to th Superintending Engineer, Tungabhadra Project. I am not aware of the exact details of the agreement arrived at at Delhi as I did not attend the Conference. I am requesting Mr. Somayajulu who was present at the Conference to intimate to you further the details of the agreements and also the position regarding the handing over of the substations and lines referred to above.

Dear Sir,

Sub:- Tungabhadra Board Meeting.

I learn that while handing over the Sub-Station at Kudlig the pick-up van attached to the Sub-Station has not been hande over with its Driver, as also the 500-kVA. transformer which wa in service at Kudligi, and that out of the two 11-kV. control cubicles that were existing at the place previously, only one has been handed over. It also appears that one single-circui telephone panel there has been removed. As the Sub-Station a Kudligi should have been handed over to the Mysore Government fully, the handing back of the above equipment to the Mysore Government may also be included as one of the subjects to be discussed at the ensuing meeting of the Tungabhadra Board.

Yours faithfully,

Sd.- G. Chandy

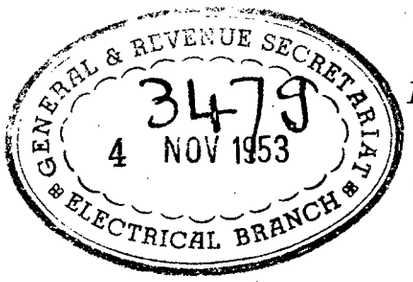
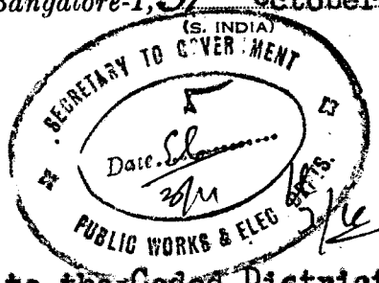
Office of the Chief Electrical Engineer
to the Govt. of Mysore,



Bangalore-1, 31st October 195 3.



Dear Sri Somayajulu,

Subject:- Power supply to the Ceded Districts - Division of power between Andhra & Mysore.

I have for acknowledgment your D.O.letter of the 22nd instant and write to inform you that under the existing conditions it is possible to give only 1720-kWs. to Andhra at present, as we have a firm commitment to the extent of 1500-kW. to the Government of Bombay, which has to be supplied immediately and further development in the Mysore territory is necessary. These loads are being fed by two 6000-kVA.banks of transformers at Bhadravati, which have a peakload of 8000-kW. at present and you will thus see that there is no possibility of giving additional power to Andhra just at present. However, we have plans to increase the transformer capacity at Bhadravati and if this materialises, the question of giving additional power to Andhra will be considered again.

Yours sincerely,

Sd.- G.Chandy.

Sri B.R.Somayajulu,
Chief Engineer for Electricit
Government of Andhra,
20, Rutland Gate,
Nungambakkam, Madras-6.

Copy forwarded to the Secretary to Government, Electrical Department, Bangalore, with a copy of the letter under reference

Copy of D.O.letter dated the 22nd October 1953 from Sri I Somayajulu, Chief Engineer for Electricity, (Andhra State), 2(Rutland Gate, Numgambakkam, Madras 6, to Sri G.Chandy, Chief I Engineer to the Govt.of Mysore, Bangalore.

------:oOo:------

I thank you for your D.O.No.B.674/1227 dated 18th Octobe: There is a certain amount of seasonal load both on the Mysore Andhra sides. The peak loads during the season would be high(than the peak loads taken into account in your letter. The di sion of load based on the actual loads as existing on the 8th may not be altogether representative.

I have already discussed with you and the Secretary to G(ment, Mysore at length regarding the supply to Hyderabad and t this should not be taken into account in the division of powe: This is so because the supply to Hyderabad was purely temporar and the period of supply as per agreement expired long ago and gave notice to Hyderabad Government that they should negotiate the 1500-kW. supply they desired from you directly. In the c cumstances I suggest that you please omit the Hyderabad supply 572-kVA. for the present purpose.

Having regard to the above factors, I suggested during th discussions at Delhi with you and the Secretary, Mysore, that 2700-kWs may be allotted to Andhra. The Secretary then sugges figure of about 2300-kW.

I request you to be so good as to allot 2300-kWs.atleast Andhra against 1720-kW.now suggested by you.

It will be seen that if only 1720-kWs.is allotted, the ac existing load that will come up in the season will be almost e(to it and there will be no power available for any further ser even from now.

I note that you propose to deal with the additional supply 2500-kWs.for the Andhra as a separate issue. But I request th(of the existing 4000-kWs. of power, you allot 2300-kWs.for the sent. This will enable just a little additional load till the tiations for 2500-kWs.of additional power are completed and an agreement therefor concluded.

GOVERNMENT OF MYSORE
ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER
Post Bag No. 15

Bangalore-1, 30 October 1953.
(Mysore, S. India)

3449

Secretary to Government
Public Works & Elec. Depts.
Date 31-10-53

The Secretary,
Tungabhadra Board,
Tungabhadra Dam P.O.,
Via Hospet, Bellary District.

S i r,

Subject:- Enumeration of works of common interest.

With reference to your letter No.TB/13/53 dated the 26th October 1953, on the above subject, I write to state that as per conditions existing today, the works of common interest between Mysore and Andhra States on the electricity side of the Tungabhadra Dam Project would be

1) the Dam Site Sub-Station,
2) the Bellary Sub-Station, and
3) the Interconnecting 66-kV. line between these two Sub-Stations.

But as per agreement arrived at at the Board Meeting on the 20th and 21st October 53, items (1) and (3) would cease to be of common interest and come under the jurisdiction of the Mysore Government. As far as item (2) the Bellary Sub-Station is concerned, this is subject to further discussion at the Boar

When the Tungabhadra Dam Project is completed, the items o common interest would be (1) the Generating Station at the Dam Site, (2) the Generating Station at the Canal and (3) the Tie-line between these two Generating Stations.

Yours faithfully,

Sd.- (G.Chandy)
CHIEF ELECTRICAL ENGINEER.

Ref: Your letter No. EDS.2843/Elec1/258/53-9 dated 12-10-53.

-ooOoo-

I am directed to state that this Government consider that according to section 48(1)(a)(ii) of the Andhra State Act, 1953, the agreement dated 1-9-47, between the Government of Mysore and the Government of Madras (Composite State) for the supply of 4,000 K.W. of power for distribution in the area served by the Ceded Districts Scheme should be deemed to have been made in the exercise of the executive power of this State and that this Government are entitled to receive a reasonable proportion of the 4,000 K.W. of power contracted for. It will be observed from the correspondence noted in the margin* (copies enclosed) that the Government of Mysore were at one time inclined to agree to fix the quantum of supply to the Andhra State at about 2,300 K.W. In the D.O. letter No. E1/A2/DCE/Mis. 191 dated 14-11-53, from the Chief Engineer (Electricity) Andhra, to the Chief Engineer (Electricity) Mysore, (copy enclosed) it has been clearly pointed out that even according to the load data collected by the Chief Engineer (Electricity), Mysore, at different places on 8-10.53, the share of Andhra State should be 2,200 K.W. as against 1720 K.W. suggested by the Chief Engineer (Electricity), Mysore.

-ooOoo-

Sub: ELECTRICITY - Arrangements for supply of Mysore power to Andhra State at Bellary.
Ref: Govt. Endtt. No. 79908-I/53-6 d/17-9-53.

Referring to the above Government Memo I give below Sri B. R. Somayajulu the Special Officer, Andhra's report regarding the discussions he had with the Secretary, P.W.D. Mysore and Chief Engineer, Mysore at Delhi, on 18-9-53.

"The matter was discussed with the Secy, Public Works, Mysore, and the Chief Engineer (Electricity), Mysore at Delhi on 18-9-53 (when we were there in connection with the Conference about the Tungabhadra Board). After taking into account the existing loads in the transferred territory the Secy. P.W. Mysore states that against the 4000 K.W. of bulk supply at Sokke about 2,340 K.W. seems to be an appropriate figure to be given to the Andhra State at Bellary. I suggested the figure 2,720 K.W. for the bulk supply. The Secretary, P.W.D., Mysore stated that the matter will be further examined and a further reply sent in about a week after 1-10-53. This may/intimated to Government."

/True copy/

Copy of D.O.No. B.674/1227 dated 18-10-53 from the Chief Engineer Elecy. Govt. of Mysore, Bangalore-1 to the Chief Engineer for Elecy. Andhra Madras.

-ooo-

Sub: POWER SUPPLY TO THE CEDED DISTRICTS - Division of power between Andhra and Mysore.

**

In continuation to the discussions we had at Delhi during the last conference on Tungabhadra Project (When the Secy. to Government, Electrical Department, Government of Mysore) was also present), I am noting below the load data collected at the different places of the system during the peak load hour (viz. 7-30 p.m.) on the 8th instant, after the metering equipment was shifted from Sokke to Bellary sub-sta

Sokke 66-K.V.	25 amps
Kudligi 11 K.V.	7 "
Dam site (Hyderabad) 11 K.V.	30 "
Dam site (Madras) 11 KV	25 "
Hospet 11 K.V.	~~25~~ 12 "
Bellary 66 K.V.	11.5 "
"	1400 KW
" Maximum demand	1590 KW
Power factor	0.74
Bellary loal 11 K.V.	26 amps
Adoni 33 KV	8 "
Rayadrug 11 Kv	4 "

From the above data it will be seen tha the loads at the differnt places:-

(a) Kudligi 11 K.V.	134 KVA
(b) Hospet 11 KV	246 KVA.
(c) Dam (Madras).11 KV	476 KVA
(d) Dam (Hyderabad) 11 KV	572 KVA
(e) Bellary local 11 KV	496 KVA
	~~1926~~ 1931 KAV.

Bellary metering 1400 K.W. - 1900 KVA at 74 % P.F.

(f) Adoni 33 KV	513 KVA
(g) Rayadrug 11 KV	77 KVA
	590

(a), Plus (b) plus (c) plus 1926 KVA

(d) plus (e)

Power consumed in Andhra area

(f) plus (g) plus (h) 1404 KVA

thus

It will be seen that the division of load betw
Mysore and Andhra should be in the proportion of 1926 : 1404 i.e
0.57 : 0.43 respectively. Thus out of the 4,000 K.W. of power
Mysore would get 2280 K.W. and Andhra 1720 K.W. In this connec-
tion I have to mention that the power factor of the system is
rather poor which must be improved immediately.

The agreement of the Government of Mysore with
the Government of Madras for the supply of power to the Ceded
Districts will continue with the Government of Andhra from
1-10-53 till the expiry of the period of the agreement.

/True copy/

-ooo-

Copy of D.O.Letter No. 2(camp) dated 22-10-53 from the Chief
Engineer (E) Andhra State, Madras to the Chief Engineer (E), Mys

**-ooo-

Dear Chandy,

I thank you for your D.O.No. B.674/1227 dated
18th October, 1953. There is a certain amount of seasonal load
both on the Mysore and Andhra States. The peak loads during the
season would be higher than the peak loads taken into account in
your letter. The division of load based on the actual loads as
existing on the 8th instant may not be altogether representativ

2. I have already discussed with you and the
Secy. to Government, Mysore at length regarding the supply to Hy
abad and that this should not be taken into account in the divis
of power. This is so beacuase the supply to Hyderabad was purel
temporary and the period of supply as per agreement expired long
ago and we gave notice to Hyderabad Government that they should
negotiate for the 1500 K.W. supply they desired from you direct
In the circumstances, I suggest that you please omit the Hyderal
supply of 572 K.V.A. for the present purpose.

3. Having regard to the above factors I suggest
during the discussions at Delhi, with you and the Secretary Mysc
that about 2,700 K.W. may be allotted to Andhra. The Secretary t
suggested a figure of about 2300 K.W.

4. I request you to be so good as to allot 23(
K.W. atleast to Andhra against 1720 K.W. now suggested by you.

5. It will be seen that if only 1720 K.W. is a
the actual existing load that will come up in the season will
be almost equal to it and there will be no power available for
any further services even from now.

6. I note that you propose to deal with the add
tional supply of 2500 K.W. for the Andhra as a separate issue.
But I request that out of the existing 4000 K.W. of power you a
2300 K.W. for the present. This will enable just a little addi
tional load till the negotiations for 2500 K.W. of additional p

I acknowledge your D.O.No.1326 dated 31-10-53.

2. The allocation of a part of the 4,000 K.W. of bulk supply at Sokke (under agreement between Madras and Mysore Govts) to the Andhra State at Bellary is in the nature of an apportionment of an existing commitment.

3. This is so because the agreement between Madras and Mysore is now an agreement between Andhra and Msyore as per the Andhra State Act.

4. All the 4000 K.W. would have been the right of Andhra except for the fact that part of the area of supply viz. 7 taluks of the Bellary district have now merged in Mysore

4. So the problem is to allocate the 4000 K.W. between the needs of the 7 taluks of Bellary and the rest of th area of supply in the Andhra State.

5. Even working on the figures of loads furnished with your D.O.No. B.674/1227 dated 18-10-53., Andhra State should get 2,200 K.W. as against 1720 K.W. mentioned in your D.O. This is explained as follows.

6. The 572 K.V.A. shown against item (d) Dam (Hyderabad) is not a commitment. It is outside the scope of the 4,000 K.W. bulk supply agreement.

7. In this connection you will recall that the agreement between the Madras and Hyderabad States for supply of power for 600 K.W. for the dam Construction works at Hyderabad side was purely a ~~xxxxx~~ temporary agreement which expired on the 19th ~~xxxx~~ July, 1952. Mysore agreed in their letter dated 21-8-52 to supply Hyderabad 1500 K.W. temporarily for a period of 18 months over and above the 4000 K.W. bulk supply to Madras. Under these circumstances power supply to Hyderabad Dam Construction works was only temporarily continued beyond ~~the~~ ⓚ additional supply of 1500 K.W. from Mysore to Hyderabad. In the light of the above the item (d) viz., 572 K.W. for Dam (Hyderabad) should be omitted from the present consideration.

8. Further the "Bellary Metering" in your statement is put at 1400 K.W. as on 8-10-53. The actual maximum demand was however 1590 K.W. as per the K.W. demand mete Therefore item (h) in your statement has to be corrected to 1064 K.V.A. against 814 in your statement. With the above two corrections the power consumed in Mysore area (a) plus (b) plus (c) plus (e) would be 1354 K.V.A. and power consumed in Andh area would be (f) plus and (g) plus (h) equal to 1654 K.V.A. With this ratio of 45:55 the share of Andhra from 4000 K.W. will be 2,200 K.W. A statement on the lines of your statement but with the ? corrections mentioned above is enclosed for your ready comparison.

9. I request you to accept the figure of 2,200 K.W. as the share of Andhra out of the 4000 K.W. It will also be sent that this 2,200 K.W. is less than the figure actuall agreed to verbally by your Secretary at Delhi viz. 2340 K.W.

10. As this matter has been pending at our level for a long time I request your early ~~xxxx~~ reply in the matter to enable me to reply the pending reference from my Government.

11. As regards the larger supply of power for developmt of the Ceded Districts in advance of the commissioning of the Tgabhadra Hydro Electric Project, I agree that it may be the subject of fresh negotiations between the States.

12. I see that you are short of 110 K.V. transformer capacity at Bhadravati. Please let me know the voltage ratio of these transformers. We can explore if we can possible spare one or two 110 K.V./33-11 K.V. transformers of 3000 K.V.A or 5000 K.V.A. capacity and would like to know if these will be useful to you.

Copy of D.O.Letter No. E1/A2/DCE/M1s/257 dated 29-11-53 Chief Engineer (E), Andhra State, to the Chief Engineer (Electrical Engineer, Mysore.

-ooo-

I acknowledge your D.O.No. 1447 da 17-11-53.

I still hold the view that the timate share of Andhra State out of the 4000 K.W. of bul supply at Sokke should be 2,200 K.W. as already explaine detail in my D.O.No. E1/A2/DCE/M1s/191 dated 14-11-53.

It is noted that the main difficul giving additional power is the shortage of power transfo capacity at Bhadravathi.

I can recommend hiring to yo 5000 K.V.A./110-66 33/11 K.V. star/star transforme These can be used by you connected back to back (viz. 11 connected to 33/66 KV) to give the desired 110/66 K.V. formation. These transformers are new and are to be com The cost of each transformer is about Rs. 1.45 lakhs. usual hiring charges are 1% per month and the transforme to be taken by you from Vijayawada and delivered back at same place when hiring period is over.

As for want of one 110/66 K.V. tra you will be obliged to use two transformers back to back recommend to our Government some relaxation of hire term

I am sure you see the advantage in these transformers. They are readily available. You can them whenver you want (i.e.) as soon as you receive the transformer ordered by you. You can straightaway deve 5000 K.V.A. load on your Jog power house. When Tungabhad Hydro Electric Scheme is commissioned by the end of 1956 release our part of the 5000 K.V.A. load. Thus you are fi up the initial period with a convenient load which will g place to your other commitments which may show up by 1956 You will be earning revenue which will be otherwise lost you get your transformers.

If you agree to hire out these trans I would request you to give us as already requested in le No. 67735-I/53-13 dated 12-5-53 to the Government of Myso power upto 2500 K.W. over and above our share of 4000 K. (in the Madras agreement). Please let me know the tariff for this 2,500 K.W. of additional supply. This power as already stated will be required till about the end of 195 (when tungabhadra Hydro Electric Power will become available.

I shall be very glad if you move you Government in the matter and let me know the result so tha the negotiations can be taken to and finalised at Governme

Letter No.141C/53-4, dated the 6th February 1954 from the Secretary to Government, Public Works and Transport Dep Government of Andhra to the Secretary to the Government of Mysore, Electrical Department, Bangalore.

Ref: Your letter No.EDS.2843/Elecl.258/53-9 dated 12-10-1953.

- - -

I am directed to state that this Government consider that according to section 48(1)(a)(ii) of the Andhra State 1953 the agreement dated 1-9-47 between the Government of and the Government of Madras (Composite State) for the sup of 4,000 K.W. of power for distribution in the area served the Ceded Districts Scheme should be deemed to have been m the exercise of the executive power of this State and that Government are entitled to receive a reasonable proportion the 4,000 K.W. of power contracted for. It will be observ from the correspondence noted in the margin* (copies enclo that the Government of Mysore were at one time inclined to to fix the quantum of supply to the Andhra State at about K.W. In the D.O. letter N .E1/A2/DCE/Mis 191 dated 14-11- from the Chief Engine (Electricity) Andhra, the Chief Engineer (Electricity) Mysore, enclosed) it has been clearly pointed out t even according to the data collected by the Chief Engineer (Elect Mysore, at different on 8-10-53 the share Andhra State should b 2,200 K.W. as against K.W. suggested by the Chief Engineer (Elec Mysore.

1. From the Chief Engineer (Electricity), Madras to Secy. P.W.D.Madras letter No. 10260/53-1, dated 24-9-53.
2. From the Chief Engineer (E) Mysore to the Chief Engineer (E), Andhra D.O. letter No. B.674/1227 dated 18-10-53.
3. From the Chief Engineer (E), Andhra to the Chief Engineer (E) Mysore, D.O. letter No.2 (Camp) dated 22-10-53.
4. From the Chief Engineer (E), Andhra to the Chief Engineer (E) Mysore, letter No. A1/A2/DCE/Mis.191 dated 14-11-53
5. From the Chief Engineer (E), Andhra to the Chief Engineer (E) Mysore D.O. letter No.E1/A2/DCE/Mis/257 dated 29-11-53.

2. In the circumstances, I am to request that you wil kindly use your good offices to obtain and communicate at a early date the concurrence of the Government of Mysore for supply of not less than 2,200 K.W. of power for distributi the Ceded Districts of this State.

3. I am to add that in regard to the assets, instalis etc. ment oned in your letter cited, necessary arrangements may have to be made by mutual agreement between the Governm of Mysore and Andhra under section 66 of the Andhra State A 1953 that this Government have already taken up this questi for examination and that the Government of Mysore will be addressed in due course.

MEMO NO.EDS 5179/Elecl 258-53-23.
DATED BANGALORE THE 19th FEBRUARY 1954.

Copy of the above is forwarded to the Chief Electrical Engineer to the Government of Mysore, Bangalore for favour immediate remarks.

By Order,

(H.Channiah)
For Secretary to Government
Electrical Department

py of letter No.10260/53-1 dated 24-9-53 from the Chief gineer (Electricity) Madras/Andhra to the Secretary to vernment P.W.D.

- - - -

Sub: Electricity - Arrangements for supply of Mysore Power to Andhra State at Bellary.
Ref: Govt. Endtt. No.79908-I/53A-6 dated 17-9-53.

Referring to the above Government Memo I give below Sri B.R.Somayajulu the Special Officer, Andhra's report regarding the discussion he had with the Secretary, P.W.D. Mysore and Chief Engineer, Mysore at Delhi on 18-9-53.

The matter was discussed with the Secretary, Public Works, Mysore and the Chief Engineer (Electricity) Mysore at Delhi on 18-9-53 (when we were there in connection with the Conference about the Tungabhadra Board). After taking into account the existing loads in the transferred territory the Secretary P.W. Mysore states that against the 4000 K.W. of bulk supply at Sokke about 2,340 K.W. seems to be an appropriate figure to be given to the Andhra State at Bellary. I suggested the figure 2,720 K.W. for the bulk supply. The Secretary P.W.D. Mysore stated that the matter will be further examined and a further reply sent in about a week after 1-0-53. This may be intimated to Government.

------ /True copy/

Copy of D.O.No.B.674/1227 dated 18-10-53 from the Chief Engineer Electricity Government of Mysore, Bangalore 1 to the Chief Engineer for Electricity, Andhra Madras.

Sub: Power supply to the Ceded Districts - Division of power between Andhra and Mysore.

- - -

In continuation to the discussion we had at Delhi during the last conference on Tunganbhadra Project (when the Secretary to Government, Electrical Department, Government of Mysore) was also present), I am noting below the load data collected at the different places of the system during the peak load hour (viz. 7.30 P.M) on the 8th instant, after the metering equipment was shifted from Sokke to Bellary Sub-Station.

Sokke 66 K.V.	25 amps.
Kudligi 11 K.V.	7 "
Dam site (Hyderabad) 11 K.V.	30 "
Dam site (Madras) 11 K.V.	25 "
Hospet 11 K.V.	12 "
Bellary 66 K.V.	11.5"
"	1400 K.W.
" Maximum demand	1590 K.W.
Power factor	0.74
Bellary local 11 K.V.	26 amps.
Adoni 33 KV	8 "
Rayadrug 11 K.V.	4 "

From the above data it will be seen that the following would be the loads at the different places:-

(a) Kudligi 11 K.V.	134 KVA
(b) Hospet 11 KV	246 KVA
(c) Dam (Madras) 11 KV	476 KVA
(d) Dam (Hyderabad) 11 KV	572 KVA
(e) Bellary local 11 KV	496 KVA
	1921 KVA

Bellary metering 1400 K.W. 1900 KVA at 74% P.F.

(f) Adoni 33 KV	513 KVA	
(g) Rayadrug 11 KV	77 KVA	
	590	
Bellary local 11 KV	496 K	
	1086 KVA	
(h) outgoing to Guntakal 1900 -	1096 :	814 KVA

Power consumed in the Mysore area
(a) Plus (b) plus (c) Plus
(d) plus (e) } 1926 KVA

Power consumed in Andhra area
(f) plus (g) plus (h) } 1404 KVA

It will thus be seen that the division of load betwe Mysore and Andhra should be in the propoetion of 1926 : 1 i.e. 0.57 : 0.43 respectively. Thus out of the 4,000 K.W power Mysore would get 2280 K.W. amd Andhra 1720 K.W. In connection I neve to mention that the power factor of the is rather poor which must be improved immediately.

The agreement of the Government of Mysore with the G ment of Madras for the supoly of power to the Ceded Distr will continue with the Government of Andhra from 1-10-53 the expiry of the period of the agreement.

[illegible] Engineer (A) Andhra State, Madras to the Chief Engineer (I Mysore.

I thank you for your D.O.No.B.674/1227 dated 18th October 1953. There is a certain amount of seasonal load on the Mysore and Andhra states. The peak loads during th season would be higher than the peak loads taken into acc in your ~~my~~ your letter. The division of load based on the actual loads as existing on the 8th instant may not be altogether representative.

2. I have already discussed with you and the Secretar to Governments at length regarding the supply to Hyderaba that this should not be taken into account in the divisio power. This is so because the supply to Hyderabad was pu temporary and the period of supply as per agreement expire ago and we gave notice to Hyderabad Government that they s negotiate for the 1500 K.W. supply they desired from you. In the circumstances, I suggest that you please omit the H bad supply of 572 K.V.A. for the present purpose.

3. Having regard to the above factors I suggested du the discussions at Delhi with you and the Secretary Mysore about 2,700 K.W. may be allotted to Andhra. The Secretary suggested a figure of about 2300 K.W.

4. I request you to be so good as to allot 2300 K.W. at least to Andhra against 1720 K.W. now suggested by

5. It will be seen that if only 1720 K.W. is allotte the actual existing load that will come up in the season will be almost equal to it and there will be no power available for any further services even from now.

6. I note that you propose to deal with the addition supply of 2500 K.W. for the Andhra as a separate issue. I request that out of the existing 4000 K.W. of power you allot 2300 K.W. for the present. This will enable just a little additional load till the negotiations for 2500 K.W additional power are completed and an agreement therefor concluded.

Thanking you.

Yours sincerely,
Sd. B.N.Somayajulu.

True copy/

Copy of D.O. letter No.E1/A2/DCE/Mis/191 dated 14-11-1953 from the Chief Engineer (E) Andhra [illegible] Chief Electrical Engineer (E), Mysore.

I acknowledge your D.O.No.1326 dated 31-10-53

2. The allocation of a part of the 4,000 K.W. of bulk supply to Sokke (under agreement between Madras and Mysore Govts) to the Andhra State at Bellary is in the na of an apportionment of an existing commitment.

3. This is a so because the agreement between Madra and Mysore is now an agreement between Andhra and Mysore as per the Andhra State Act.

4. All the 4000 K.W. would have been the right of Andhra except for the fact that part of the area of suppl viz. 7 taluks of the Bellary district have now merged in Mysore.

5. So the problem is to allocate the 4000 K.W. betw the needs of the 7 taluks of Bellary and the rest of the area of supply in the Andhra State.

6. Even working on the figures of loads furnished w your D.O.No.B.674/1227 dated 18-10-53. Andhra State shou get 2,200 K.W. as against 1720 K.W. mentioned in your D.O This is explained as follows.

7. The 572 K.V.A. shown against item (d) Dam (Hyder is not a commitment. It is outside the scope of the 4,0 K.W. bulk supply agreement.

8. In this connection you will recall that the agre between the Madras and Hyderabad States for supply of po for 600 K.W. for the dam Constructi n works at Hyderabad was purely a temporary agreement which expired on the 1 July 1953. Mysore agreed in their letter dated 21-8-52 supply Hyderabad 1000 K.W. temporarily for a period of 1 over and above the 4000 K.W. bulk supply to Madras. Und circumstances power supply to Hyderabad Dam construction was only temporarily continued beyond 19-7-52 to avoid interruption of supply to Hyderabad pending the addition supply of 1500 K.W. from Mysore to Hyderabad. In the light of the above the item (d) viz. 572 K.W. for Da

9. Further the "Bellary Metering" in your statement put at 1400 K.W. as on 8-10-53. The actual maximum dem was however 1590 K.W. as per the K.W. demand meter. Therefore item (h) in your statement has to be corrected 1064 KVA against 814 in your statement. With the above two corrections the power consumed in Mysore area (a) plu (b) plus (c) plus (e) would be 1354 K.V.A. and power cons in Andhra area would be (f) plus and (g) plus (h) equal t 1654 K.V.A. With this ratio of 45:55 the share of Andhra from 4000 K.W. will be 2,200 K.W. A statement on the lin of your statement but with the 2 corrections mentioned ab is enclosed for your ready comparison.

10. I request you to accept the figure of 2,200 K.W. as the share of Andhra out of the 4000 K.W. It will also seen that this 2,200 K.W. is less than the figure actuall agreed to verbally by your Secretary at Delhi viz. 2340 K

11. As this matter has been pending at our level for long time I request your~~xxxx~~ early reply in the matter t enable me to reply the pending reference from my Governme

12. As regards the large supply of power for develop of the Ceded Districts in advance of the commissioning of the Tungabhadra Hydro Electric Project, I agree that i be the subject of fresh negotiations between the States.

13. I see that you are short of 110 K.V. transformer capacity at Bhadravathi. Please let me know the voltage of these transformers. We can explore if we can possible spare one or two 110 K.V/33-11 K.V. transformers of 3000 K of 5000 K.V.A. capacity and would like to know if these wi

/True copy/

Copy of D.O. letter No.E1/A2/DCE/Mis/257 dated 29-11-53 fr the Chief Engineer (E) Andhra State to the Chief Electrica Engineer, Mysore.

I still hold the view that the legitimate share of Andhra State out of the 4000 K.W. of bulk supply at Sokke should be 2,200 K.W. as already explained in detail in my No.E1/A2/DCE/Mis/191, dated 14-11-53.

It is noted that the main difficulty giving addition power is the shortage of power transformer capacity at Bha

I can recommend hiring to you 2 Nos. 5000 K.V.A./110 11 K.V. star/star transformer. These can be used by you connected back to back (viz. 110 KV/33 connected to 33/65 to give the desired 110/66 K.V. transformation. These tra formers are new and are to be commissioned. The cost of e transformer is about Rs.1.45 lakhs. The usual hiring char are 1% cost per month and the transformers are to be take by you from Vijayawada and delivered back to the same plac when hiring period is over.

As for want of one 110/66 K.V. transformer you will obliged to use two transformers back to back I can recomme our Government some relaxation of hire terms.

I am sure you see the advantage in hiring these transformers. They are readily available. You can return them whenever you want (i e) as soon as you receive the transformer ordered by you. You can straightaway develop 5000 KV.A. load on your Jog Power house. When Tungabhadra Hydro Electric Scheme is commissioned by the end of 1957 we will release our part of the 5000 K.V.A. load. Thus you are filling up the initial period with a convenient load which will give place to your other commitments which may show up by 1956. You will be earning revenue which will be otherwise lost till you get your transformers.

If you agree to hire out these transformers I would request you to give us as already requested in letter No. 67735/53-13, dated 12-5-53 to the Government of Mysore additional power upto 2500 K.W. over and above our share of 4000 K.W. (in the Madras agreement). Please let me know th tariffs etc. for this 2,500 K.W. of additional supply. Thi power as already stated will be required till about the end 1956 (when Tungabhadra Hydro Electric Power will become available).

I shall be very glad if you move your Government in the matter and let me know the result so that the negotiati can be taken to and finalised at Government level early.

ir,

Sub: Electricity - Supply of power to Ceeded Districts.

With reference to your memo No.EDS.5179/ lecl.258-53-23 dated 19-2-1954 forwarding a opy of letter No.141C/53-4 dated 6th February 954 from the Secretary to Government, Public orks and Transport Department, Government of ndhra to the Secretary to Government of Mysore, lectrical Department, Bangalore, I write to enlose herewith a copy of my D.O. No.1740 dated 3-12-1953, which is self-explanatory.

Yours faithfully,

G. Chandy

(G.Chandy)
CHIEF ELECTRICAL ENGINEER.

Copy of D.O. No.1740 dated 23-12-1953 from Sri G.Chand M.S.E.E., Chief Electrical Engineer in Mysore, Bangalore to Sri B.R.Somayajulu, M.I.E.E., M.I.Mech.E., M.I.E., Chief Engineer for Electricity (Andhra State), 20 Rutlandgate, Nungbakkam, Madras-6.

I acknowledge receipt of your D.O.No.El/A2/DCE/Mis/25' dated the 29th November 1953. I cannot subscribe to your v: that 2,200 K.W. is legitimately due to Andhra State out of t 4,000 K.W. of bulk supply at Sokke in view of the fact that commitment to the Hyderabad State was made by the Madras Sta and it was the responsibility of that State to have terminat that agreement and terminated the supply and not left it to Mysore Government to take up this question.

With regard to the shortage of transformer capacity a Bhadravati, I write to state that the position has somewhat altered since I last wrote to you as two 6000 KVA. Transform which have been on order at Belgium are in the process of sh ment and are expected to be received very early. Our diffi culty is not only transformer capacity, but the requisite sw gear, such as Circuit Breakers of 110 and 66 KV. which have yet arrived. Should these equipments arrive, I will re-examine the question and see whether any more additional pow can be made available to you.

Sub: Electricity - Supply of additional power of 2500 K.W. for Ceded Districts.

CF P.80.

With reference to your letter No.EDS.2869/Elecl.258-53-27 dated 21-8-1954, I write to state that we will be able to supply 2500 K.W. of additional power to Andhra, till the end of December 1955 after installing the 2 of 6000 kVA. transformers at Shimoga for which an estimate has already bee sanctioned and which is expected to be serviced before the end of the calender year. The question of continuing this additional power supply after December 1955 will have to be reviewed in the light of conditions prevailing at that time.

When this additional power supply is arranged, the rates will be as per the revised tariff, for the entire load that is being supplied to Andhra from the date of commencemer of supply of this additional load. The rates are being worl out and will be submitted for information of Government very early.

11 NOV 1954
ELECTRICAL BRANCH

Dear Sri Srinivasachar,

Sub:- ELECTRICITY - Supply of additional power of 2,500 K.Ws. for Ceded Districts - Terms and conditions.

Ref:- From the Government of Mysore, Electrical Department Letter No.EDS.2870/Elec1./258-53-26 dated 21st August, 1954.

-oOo-

I am to invite your attention to para 3 of this Government's letter No.3520-I/54-9 dated 4th October '54 wherein this Government have ratified, among others, the conclusion in respect of item 19 on the above subject in the summary of results of discussions arrived at the Conference of official representatives of this Governmen and 16-7-54 and the Government of Mysore held on 15-7-54 at Bangalor sent with D.O. No.Ch.S.5777/54 dated 17th July 1954 of t Chief Secretary to the Government of Mysore and to reque that this Government may be intimated of the terms and conditions on which the supply of additional power of 2,500 K.Ws. agreed to would be made available. I am to suggest that in order to expedite matters for the quick execution of an agreement a suitable date may be fixed v early on which our Chief Engineer for Electricity may di the terms and rates for this additional supply of power your Chief Electrical Engineer at Bangalore.

With best regards

Yours Sincerely,

K.N. Anantaraman

(K.N.ANANTARAMAN),
SECRETARY TO GOVERNMENT.

Filed 258-53-31

D.O.No.141-C/D/53-23.

Public Works & Transport Depart
Kurnool,
Dated the 12th November, 1954

OFFICE OF GOVERNMENT SECRETARIAT

15 NOV 954
ELECTRICAL BRANCH.

Dear Sri Srinivasachar,

Sub: Electricity - Supply of power to Ceded Districts.

Ref: This Government letter No. 141-C/D/53-20 Public Works and Transport Department dated 19-10-54. C.F.P.

-:-

In continuation of the letter cited, I am to state that the allocation of the total supply of 4000 K.W. under the Ceded District Power Agreement between Mysore (requirements of the 7 taluks of Bellary transferred to Mysore) and Andhra has, it will be remembered yet to be finalised. The Government of Mysore have stated that the allocation to the Andhra State should be 1720 K.W. while this Govern ment have with reference to the actual position pointed out that the allocation should not be less than 2,200 K.W - Vide this Government's letter No.141-C/53-4 Public Works and Transport dated 6-2-54 to the Government of Mysore. During the Inter-State Conference held at Bangalore on 15th and 16th July,'54 the Government of Mysore have agreed that the power supply that may be allocated to the Andhra Sta may be fixed at 2,000 K.W. in view of the fact that this Government have already drawn this quantity of power. The formal ratification of the proceedings of the Inter-State Conference has since been communicated to your Government with this Government's letter No. 3520 -I/54-9 Public Works and Transport dated 4-10-54. The maximum Demand of Jog power purchased from Mysore has exceeded 1720 K.W. and reached 2000 K.W. even before supply was switched on to Kurnool and the Electricity department of this Government has made suitable arrangements to see that the Maximum Demand does not exceed 2000 K.W. even after switching on Mysore Jog power to Kurnool. In fact the diesel generation station at Kurnool is being run during peak hoa period from 5 P.M. to 10 P.M. and the drawal of Jog power is restricted to nonpeak load hours. As it has already been mutually agreed to between the representatives of the two Governments that the Andhr State should be allocated 2,000 K.W. and as the ratification of this

vernment to the above allocation which was only a formal matte
s since been communicated to the Government of Mysore, it was
pected that the Government of Mysore will not stand on any
rict formalities and have any objection to any small excess ov
d above 1720 K.W. upto 2,000 K.W. especially after this fact h
en ~~instructed~~ intimated to them at the Inter-State conference. I am to
pe that the Government of Mysore will kindly appreciate the
eds of this Government and agree to the quantity of power take

Yours sincerely,

K. Anantaraman

(K.N.Anantaraman)
Secretary to Government.

Dear Sri.Anantharaman,

Subject:- Electricity - Supply of pow
Ceded Districts

Kindly refer to your letter No.141-C/D/
dated 12th November on the above subject.

I am to point out that the figure of
for Andhra territory(out of the total suppl
4000 K.W. that was being made prior to the
of Andhra State, was fixed up with referenc
the actual consumption in the two territori
~~or about~~ 30th September 1953. It was no d
agreed at the Inter-State Conference held
1954 that this might be stepped up to 2000
but this agreement is still to be ratified
Government level. As has been stated in my
letter, it is reported that power far in ex
the above-mentioned quantity of 1720 K.W.
drawn in view of the switching-on of Jog
at Kurnool. I am to say that it would not
in order to draw this excess power before
agreement is duly ratified.

3. I am to request that even now the
already called for, namely, the amount of ex
power that is being drawn and the circumst
in which it was drawn without previous ~~consent~~
this Government may kindly be furnished.

Yours sincerely

P.W.D. Secretary, Andhra
(By name)

Dear Sri. Muthucreman,

Subject:- Flexibility - Supply of power to Coded Districts

Kindly refer to your letter No.161-C/6362-G dated 12th November on the above subject.

I am to point out that the figure of 7 0-
for Madura territory(out of the total supply of
6000 K.W. that was being made prior to the form-
at Madura Stage was fixed up with reference to
the actual consumption in the two territories on
or-about 30th September 1953. It was no doubt
agreed by the Inter-State Conference held in Jul
1954 that this might be stepped up to 8000 K.W.,
but this agreement is still to be ratified at
Government level. No use been effected in my earl
letter in is reports that part in excess o
the above-mentioned quantity of 1720 K.W. is bei
drawn in view of the switching-on of Pykara power
at Burnpal. I am to say that it would not be
in order to draw this excess power before the
agreement is duly ratified.

3. I am to request that even pox the time
already called for namely the amount of extr
power that is being drawn and the circumsta one
in which it was drawn with previous consent of
this Government may kindly be furnished.

Yours sincerely,

Dear Sri Anantharaman,

Subject: Electricity - Supply of power to Ceded Districts.

Kindly refer to your letter No.141-C/D/53-23, dated 12th November on the above subject.

I am to point out that the figure of 1720 K.W. for Andhra territory (out of the total supply of 4000 K.W. that was being made prior to the formation of Andhra State) was fixed up with reference to the actual consumption in the two territories on 30th September 1953. It was no doubt agreed at the Inter-State Conference held in July 1954 that this might be stepped up to 2000 K.W. but this agreement is still to be ratified at Government level. As has been stated in my earlier letter, it is reported that power far in excess of the abovementioned quantity of 1720 K.W. is being drawn now in view of the switching-on of Jog power at Kurnool. I am to say that it would not be in order to draw this excess power before the agreement is duly ratified.

3. I am to request that even now the information already called for, namely, the amount of extra power that is being drawn and the circumstances in which it was drawn without previous consultation with this Government may kindly be furnished.

To

Sri K.N.Anantaraman, I.C.S.,
Secretary to the Government o
Public Works and Transport Departme
KURNOOL.

Dear Sri Srinivasachar,

Sub:- Electricity - Supply of power to Ceded Districts.

C.F.P.90.

Ref:- Your D.O.No.EDS.4590/Elecl.-258-53-32 dated 6th December 1954.

-oOo-

From your D.O. cited, it appears that the Governm f Mysore are under the impression that the power drawn y this Government over and above the limit of 1,720 K.W eferred to by you is a direct sequel to Kurnool switchi n to Jog supply.

2. This is not so. I am to state that the Maximum emand actually came up to about 2,000 K.W. even before he Inter State Conference held in July 1954 and in view f this fact, the limit of 2,000 K.W. as Andhra share wa greed to at that Conference. A quantum of about 2,000 ontinued to be drawn by this Government. As it has lready been mutually agreed to between the representati f the two Governments, that the Andhra State should be llocated 2,000 K.W. and as the ratification of this overnment to the above allocation was only a formal atter which has since been communicated to the Governmer Mysore, (vide this Government Letter No.3520-I/54-9 ated 4th October 1954), it was expected that the Govern- ent of Mysore will not stand on any strict formalities id have any objection to any small excess over and above ,720 K.W. upto 2,000 K.W. before the agreement is actual atified. But it has now been stated that it would not in order to draw the excess power over and above 1,72C to 2,000 K.W. before the agreement is duly ratified. I to invite your attention in this connection to Mysore

Government's letter No.ChS.14985/54-55 dated 27th Novemb
1954 wherein it has been requested that in accordance wi
the agreement arrived at during the Inter-State Conferen
the outstanding bills in respect of power charges both
prior to and after 1st October 1953 might be caused to b
paid and that a final communication in regard to the
ratification of the proceedings would be sent after a
reply is received from this Government in regard to this
and certain other points raised therein. It would be
seen from the above that the Government of Mysore are
agreeable to implement the decisions arrived at at the
Inter-State Conference pending formal ratification of
the decisions. This Government have also authorised the
Chief Engineer (Electricity) of this State to arrange
for the payment of bills of the Government of Mysore
for bulk supply made from 1st October 1953 and necessary
action is being taken in respect of bills for supply
prior to 1st October 1953. In view of this, it is only
reasonable to expect that the Mysore Government will
not object to this Government drawing power to the exter
of about 2,000 K.W. which is in accordance with the
decisions arrived at at the same Conference pending
formal completion of the agreement.

3. In this connection, I am to add that the Chief
Engineer (Electricity) of this State has since reported
that Jog Power that has actually been availed of as

; will be seen from the above that, as a result of arnool being switched over to Jog Power, ~~xxxxx~~ the otal consumption by this Government has not materially ceeded the agreed limit.

Yours Sincerely,

K.N. Anantaraman

(K.N. ANANTARAMAN),
Secretary to Government.

No. P. 5377

GOVERNMENT SECRETARIAT MYSORE 5011 28 JAN 1955 ELECTRICAL BRANCH

GOVERNMENT OF ANDHRA सत्यमेव जयते

D.O.No.14/C/D/53(P.W.&T.)

KURNOOL,
17th January 195

SECRETARY TO GOVERNMENT Date 2-2-55 PUBLIC WORKS & ELEC DEPTS.

My dear Sri Manjappa,

Sub: Electricity - Supply of additional power of 2,500 K.W. for Ceded Districts.

I am writing this letter in the absence of Minis in this State and taking advantage of our long friendshi so as to clinch a question which seems to be dragging on somewhat indefinitely.

The Ceded Districts have been getting electric power from your State from Jog, pending completion of th Tungabhadra Hydro Electric Scheme. The Mysore State hav agreed to supply 4,000 K.Ws of power for distribution in the Ceded Districts. As early as 1952 a reference was made by the Government of the Composite State of Madras, stating that there was a considerable demand for power in Ceded Districts and asking for an additional quantity of 2,500 K.Ws. The agreement of 1947 provides for addi- tional supply. This question was also discussed at a conference of the representatives of Andhra and Mysore Governments held at Mysore on 15th and 16th July 1954 an at that conference, the representatives of the Mysore Government have agreed, subject to availability, to make available 2,500 K.Ws of additional power to be delivered at the Andhra portion of the Bellary sub-station, on terms and conditions to be agreed upon. The conclusions reached at the conference have been ratified by this Government in their letter No.3520-I/54-9, dated 4th October 1954.

2. With regard to additional supply, Sri D.K. Srinivasachar has also been addressed by the Secretary t Government, Public Works and Transport Department of thi State in D.O.No.14-C/D/53-12, dated 6th November 1954 (c enclosed for ready reference). In his reply, Sri Srini- vasachar referred to his letter No.Ch.S.14985/54-55 date 27th November 1954, in which he raised a number of point dealt with at the Inter-State Conference referred to above. One of the points relates to the existing supply a reply in regard to which has been sent in D.O.No.141-C, dated 31st December 1954 of the Secretary, Public Works and Transport.

3. With regard to the other points (which do not relate to Electricity at all) I am to state that they ar under correspondence with the Chief Engineers of this State and replies will be sent as expeditiously as possi The need for getting an additional supply has been raise as long back as 1952. With the formation of the new Sta of Andhra the demand has increased considerably. It may not be necessary to wait for clearing all the points rai at the Conference, as some of them relate to a variety o subjects. Regarding this particular matter, there has been agreement and this need not be held up for the rati cation of the conclusions which is only a formal matter.

Besides, this position had been accepted even in 1947 and the Government of the Composite State had asked for an additional supply ~~of~~ over the quantity 4,000 K.W. even in 1952. I am to request that the Government of Mysore will be good enough to make this additional power available subject to our accepting the terms and rates as may be mutually settled and to fix an early date for the Chief Engineer (Electricity) of this State to go over to Bangalore to discuss the terms with your Chief Electrical Engineer.

Yours sincerely,

Copy of D.O.No.14-C/D/53-12, dated 6.11.1954 from Sri K.N. Anantaraman,I.C.S., Secretary to Government of Andhra, Publi Works and Transport Department, Kurnool to Sri D.K. Srinivasachar,I.A.S., Secretary to Government of Mysore, Public Works Department, Bangalore.

Sub: Electricity - Supply of additional power of 2,500 K.Ws. for Ceded Districts - Terms and conditions.

Ref: From the Government of Mysore Electrical Department, letter No.EDS.2870/Elecl./258-53-26, dated 21.8.1954.

I am to invite your attention to para 3 of this Government's letter No.3520-I/54-9 dated 4.10.1954 wherein this Government have ratified, among others, the conclusion in respect of item 19 on the above subject in the summary of results of discussions arrived at the Conference of official representatives of this Government and the Government of Mysore held on 15.7.1954 and 16.7.1954 at Bangalore sent with D.O. No.Ch.S.5777/54 dated 17.7.1954 of the Chief Secretary to the Government of Mysore and to request that this Government may be intimated of the terms and conditions on which the supply of additional power of 2,500 K.Ws agreed to would be made available. I am to suggest that in order to expedite matters for the quick execution of an agreement a suitable date may be fixed very early on which our Chief Engineer for Electricity may discuss the terms and rates for this additional supply of power with your Chief Electrical Engineer at Bangalore.

With best regards.

OFFICE OF THE MINISTER FOR AGRICULTURE
No. P.3026
24 MAR 1955

My dear Shri Hanmanthaiah,

As I am writing to you for the first time, may I at the outset extend to you my cordial greetings and hearty good wishes.

The subject matter of this letter is the additional supply of Jog power to the Ceded districts. I am sure you know the history of the case better than I do, but perhaps I may summarise it for the sake of convenience.

prepare draft reply
23.3.55
Minister for E.
O.P.W. Sec

Secretary, P.W.D.
Rhagavan Sir, 24/3.
Pwk up file.
5/4/55.

2. Under an agreement dated 1-9-1947 between the Government of Mysore and the Government of Madras, the former agreed to supply in bulk Jog power upto 4,000 K.Ws. for distribution in the Ceded districts and for any other purposes for which the Government of Madras might require such power. This agreement provided also for supply of such additional power as the Government of Mysore might be willing to make on terms and conditions to be mutually agreed upon. Jog power commenced to be delivered at Sokke near Ujjini in Bellary district from the 7th June 1949. Since then, the demand for power in the Ceded districts has been growing rapidly. In 1952, on a review of the distribution schemes then sanctioned, and expected to be sanctioned, the Government of Madras realised that the limit of 4,000 K.Ws., agreed to in 1947, would be reached by the middle of 1954, while the Tungabhadra hydro-electric scheme was not expected to commence supply till the end of 1956. A request was, therefore, made to your Government in October 1952 to supply an additional quantity of 2,500 K.Ws. in bulk on terms and conditions identical with those of the agreement of 1947.

After the transfer of seven taluks of the Bellary district to Mysore on 1-10-53, the point of supply to the Andhra State has been shifted to the Bellary sub-station, and the Government of Mysore took up the question of the quantum

of power that should be supplied to our State out of the 4,000 K.Ws. agreed to in 1947. At a conference of the repr sentatives of the Governments of Mysore and Andhra, held at Bangalore in July 1954, it was agreed to allocate 2,000 K.W of power to the Andhra State. It was further agreed that a additional 2,500 K.Ws. be delivered, subject to availabilit at the Andhra portion of the Bellary sub-station on terms and conditions to be agreed upon. The Government of Madras up to October 1953, and thereafter the Government of Andhra have all along felt fully confident that your Government wi supply an additional quantity of power of 2,500 K.Ws. and based on this confidence, a large net work of transmission and distribution lines has been undertaken and completed in the Ceded districts. These lines can be brought under operation immediately, if additional power is made availabl The benefits of extension of electricity supply to the Ceded districts hardly need emphasis. In the absence of this sup the work done and the amount spent on transmission and distribution lines will be infructuous for the time being, as there is no other source of power at present for these districts, and so far as can be foreseen at present, Tungab power will not be available before the middle of 1956.

The proceedings of the Bangalore conference, to which I have referred, and which inter alia relates to a supply of 2,500 K.Ws. of additional power, were ratified by us. Ratification by your Government is, I am told, pending, as some information regarding irrigation matters, which is not relevant to the issue of additional supply of Jog power has yet to be interchanged between the two States. At your end, the matter rests with Shri Srinivasachar's D.O. letter to Shri Pulla Reddi dated the 11th March 1955.

3.This, in brief, is the history of the case as I see it and I am venturing to trouble you personally over this matt with the full hope

agreeing to provide us with this additional power. If you give the word "go", terms and conditions can be settled very quickly. Matters relating to irrigation might, I venture to suggest, be treated separately.

I shall be most grateful if you would very kindly look into this matter and bring it to a head. If you desire that I should depute a representative to discuss any point with y officers, I shall be only too happy to do so, the moment I hear from you. My sole anxiety is to see that this business which is holding up the much-needed supply of electricity to the Ceded districts, is settled urgently with your good offi

With all kind regards,

Yours sincerely,

C. Triveli

The Secretary to Government,
Electrical Department,
B a n g a l o r e.

S i r,

Additional power supply to Andhra to an extent of 2500-kW.for a temporary period of 16-18 months.

I am enclosing herewith a copy of letter No.T-37405 date the 21st February 1955 addressed to me by Shri M.Hayath, Memb Central Water & Power Commission (Power Wing) on the above su ject, and write to state as follows:-

At the Conference of Official Representatives of the Gov of Andhra & Mysore, held in Bangalore on the 15th & 16th July it was agreed that out of the 4000-kWs.of power contracted to supplied to the Ceded Districts before the formation of Andhr State, the power allotment to the Andhra State should be rais from 1720-kW. to 2000-kW. With regard to the additional pow to the extent of 2500-kW.requested for by Andhra for about 2½ years until the Tungabhadra Hydro-Electric Project commences ration, it was also agreed that subject to availability the a tional power asked for may be delivered to them at the Andhra portion of the Bellary Sub-Station on terms and conditions to agreed upon.

There are two 6000-kVA.transformer banks at Bhadravati c nected to M.B.T.No.I Line (from which the line supplying powe T.B.Dam, Bellary & Andhra areas is being fed) and a peak-load occurs 11400-kW. or 12600-kVA. at 0.9 power factor/on this Bank for period of 15 minutes to half an hour. The additional load requested for by Andhra can be given, provided they keep the load down to reasonable limits during our peak hours (viz. 6 to 9 p.m.). The agreement entered into with the old Madras Government for power supply to the Ceded Districts terminates

6-6-1957, but it may be extended for a further period at the re
quest of the consumer. If the Andhra Government agrees to pay
for the additional power at the rate to be worked out by the Po
Rates Committee which is now engaged on the work of rationalisa
tion of power rates, the additional power of 2500-kWs.asked for
by Andhra may be given for a short period of 16 to 18 months an
a little extra revenue earned thereby.

The decision of Government in the matter may kindly be ob-
tained and communicated at the earliest, to enable me to send a

Copy of the letter No.T-37405 dated 21st February 1955 from Sri M.Hayath, Member, Ministry of Irrigation & Power, Central Water and Power Commission (Power Wing), Government of India, New Delhi to Sri George Chandy, Chief Electrical Engineer, B'lore

---

During the recent visit of your Minister for Electricity, Sr Naganna Gowda, I called on him to pay my respects. During my di cussions I brought to his notice that the Chief Electrical Engine Government of Andhra has constructed transmission and distributio system for utilising about 2500 KW of power in the area adjoining Mysore State near Tungabhadra. As you are aware, power from the Tungabhadra Station is not expected to be available for nearly si teen months more. Therefore the outlay incurred in the distribu system constructed, would be infructuous if power to the extent r quired for distribution in this area is not made available from o sources immediately. The population of the place also will be d the benefit of electricity for the period referred to above. In much as the necessary transmission system linking Tungabhadra and Jog Systems exist, it is felt that power to the extent of 2500 KW could be easily made available for utilisation in the area mentio earlier, with benefit of revenue to Mysore as well as benefit to people living in the area adjoining Tungabhadra. The Minister Minister agreed to have the proposal examined and recognised the benefits that would accrue to both the Mysore and Andhra States, by making available power mentioned above.

It is recognised that there is power shortage in Mysore if a the firm commitments already made are to be met. In as much as the power allotted to the Governments of Bombay, and Madras (Sout Canara) is not likely to be utilised to the maximum, contracted f within the next 16 months, it would be possible for you to meet t demands of the Andhra State to the extent of 2500 KW. without inc veniencing either the consumers in the Mysore State or Bombay or Madras. This in return is likely to bring in substantial revenu to the Mysore Electricity Department. I understand the Governmen of Andhra have made the necessary request and I would feel oblige if you will kindly convince your Government that the grant of pow supply to the extent of 2500 KW to Andhra Government for utilisat in their area near Tungabhadra is beneficial to both the States, secure their approgal and arrange for the power supply as early a possible.

A line in reply as to the action taken in this behalf will b greatly appreciated. I may also mention that during my talk wit the Minister, your Secretary happened to be present and he was go enough to promise examination of the proposition and the neeful a being taken.

My dear Sri Trivediji

I have your letter of 20th March about additional supply of power from Jog to Andhra. I thank you for the greetings and good wishes you have conveyed.

I have had the question of additional power supply examined. I am sure you would have gathered from Press and other reports that we are ourselves facing serious power shortage in the near future. We have already reached a stage at which it will not be possible to think of any large additional supply without immediately improving our production capacity. The commitments we have undertaken are expected to exhaust our present capacity by next year. Even today, it has not been possible to supply power to large areas of the State, particularly in the eastern districts. In Bangalore itself, we have had to impose severe power restrictions and it is only recently that the Planning Commission agreed to some proposals which would enable our bringing in more of Jog power to this area.

You will kindly appreciate that any large additional supply such as has been asked for is therefore difficult. Even such small supply as may be possible with suitable readjustment can at best be of very short duration and may not help your State materially. Let me assure you that if only we could assist in a suitable manner we would like to do so. Indeed, under the allocation of the Ceded Districts power after the merger of Bellary, more than the due share of Andhra is being supplied to that State.

If your Government would be satisfied with a comparatively small additional supply for a few months, I feel it may be possible to consider it. In that event, I would suggest a representative of your Government being sent over here for discussion.

With kind regards, Y.S.

(K. Hanumanthaiya)

No. 489/G.A/55.
RAJ BHAVAN
KURNOOL
18th April 1955.

My dear Shri Hanumanthaiya,

I write this in continuation of my D.O. letter No. 459/G.A/55 dated the 8th April, and my Personal letter of the 9th April, regarding the supply of additional power from Jog.

2. I have had this case looked into. The peak load of the Kurnool Power House has already reached 940 K.W., and is, according to our calculations, likely to rise to 1250 K.W. in about the next 15 months, when we expect power from the Tungabhadra to be available. The anticipated increase of 310 K.W., ~~xxxxxxxx~~ over the present figure of 940 K.W., is based on a total additional connected load of 620 K.W. in Kurnool, details being as under:-

1. L.T. Industrial loads for oil mills and flour mills, etc.	200 K.W.
2. House Services in town (600 numbers).	200 K.W.
3. House services in Government Camps for 2nd batch of 500 quarters.	200 K.W.
4. Legislature Hostel under construction.	20 K.W.
Total.	620 K.W.

3. In the circumstances we should be most grateful if you would very kindly agree to supply us 1250 K.W. from Jog until such time as the Tungabhadra power will be available. (As anticipated at present, the Tungabhadra power will be available in about 15 months' time.) If you will very kindly accede to our request, we should be able to close down the Kurnool Power House, and this closure will, as you know, give great relief to the residents of Raj Bhavan and the guests.

I suggest that all these matters be discussed personally at Bangalore. Would it be all right if we depute our Chief Engineer and Secretary, P.W.D. to discuss this whole question, including, of course, the question of rates, with the officers of your Government, or do you think a Minister from Andhra should come to Bangalore?

4. I am leaving Kurnool for Ootacamund on the morning of the 24th, and will be most grateful for a reply at your earliest

convenience. If you agree to a meeting, the date can be settled by mutual consultation amongst our officers.

5. As I have said in my previous communications, I am most grateful to you for the consideration you are showing us over this case; my Ministers share this gratitude.

D.K. Srinivasachar, I.A.S.
Secretary to Government, P.W.D.

GOVERNOR ANDHRA

MYSORE GOVERNMENT SECRETARIAT 1680 29 JUL 1955 ELECTRICITY BRANCH

Office of the Chief Minister
No P.S.53
Date of Receipt 10/6/55

My dear Shri Hanumanthaiya,

Kindly refer to the correspondence resting with my D.O. letter No.535/G.A./55 dated 1st May 1955 about the supply of additional Jog power to Andhra. As suggested by Dr. Nagan Gowda, we sent our Chief Engineer for Electricity to discuss the question with the Chief Engineer, Mysore and the Electricity Secretary, Mysore Government. I met our Chief Engineer yesterday, and he informed me that nothing definite emerged from his discussions with the officers of your Government. According to our Chief Engineer, your Electricity Secretary told him that he was under the impression that only one or two hundred K.W. additional power was being asked, for and that if we required as much as 1250 K.W. the case will have to be dealt with at the Ministerial level. The Secretary was then informed that the requirements of additional power were given in my correspondence with you. The Secretary is then stated to have said that he was aware of this communication; but he still felt this was a matter for discussion at the Ministerial level. Again there was no agreement of any kind about rates. It was suggested that the Mysore Government was considering revised high tension tariffs. Our Chief Engineer replied that pending revision of tariffs, power may be supplied to us at the existing rates. Any general revision which might take place would of course apply to tariffs. This is the position in a nutshell as reported to me, and it is clear that after several months we are where we were.

OFFICE OF THE ... FOR INDUSTRIES No. 190 18 JUN 1955

2. It was at your suggestion that it was decided to discuss this matter at the official level. The position apparently is, that Mysore is in a position to supply additional power to us until such time as Tungabhadra scheme comes into operation, the questions for consideration and decision being the amount to be supplied and the rates to be charged. We are as anxious as before to obtain additional power for the reasons given in

Ele. Secy to discuss. Here 19.6.55

Discussed. The matter may lie over for the present.

Here 28/7 28/7 28/7

that the discussions at the official level have proved co
fruitless. The next step if any, rests with you, because
obviously, there is nothing more that I can do. I would
be very grateful if you can do anything for us. But if
unfortunately you cannot do anything, we have to accept t
position, however distressing and unsatisfactory it may b
to us. I end this letter with the hope that you will do
something.

With all kind regards,

Letter No. A/B.674/58302-3 dated 5-12-1956 from the Chief Engineer, Electricity, Governmentof Mysore, Bangalore, to the Secretary to Government, Electrical Department, Bangalore.

Sub: Power supply to Andhra Government.

With reference to the above, I write to state that during 1947, an agreement was entered into by our Government with Madras Government towards power supply to an extent of 4,000 K.W. for a period of 8 years fromt he date of its supply. The power supply which was meant for distribution by Madras Government in ceded districts was arranged for by this department from 7-6-2949. With the formation of Andhra State during 1953, this load allotment of 4,000 K.W. had to be allocated between Mysore and Andhra Governments and during the Inter State Conference held at Bangalore on 15-7-1954 and 16-7-1954, our Government had agreed to allot only 2,000 K.W. to Andhra (vide this office D.O. letter No.1528-31 dated 17-9-1954 addressed to Sri Somayalulu, Chief Engineer for Electricity, Andhra, with a copy to you, your Memo No.EDS.3301/Elecl. 243-54-3 dated 21-9-54 and this office letter No.69383 dated 16-3-55 addressed to you).

2. The Andhra Government have not been confining their load requirements even to the above agreed limit of 2,000 K.W.; but are consistently exceeding it, making use of loads up to 2,5000 K.W. and above since March 1956. In the marginally noted letters of this office, I have requested them to release the loads used by them in excess of 2,000 K.W.

Letters of this office:

1) D.O.letter No.3642-3/24-3-56 addressed to Sri Somayalulu, Chief Engineer for Electricity, Govt. of Andhra, Electricity Department.,
2) D.O. letter No. A/B674/1032-3/30-6-56 -do-
3) A/B674/43794/1-10-56 addressed to Chief Engineer, for Electricity, Govt. of Andhra.

3. The Chief Engineer for Electricity, Government of Andhra Electricity Department, in his letters Nos. E4/A-2/0 and M.D-2/430 dated 17-8-56, E/4/A.2/0 & M.D-2/682 dated 31-10-56 and E/4/A/2/0 & M.D-2/786 dated 23-11-56, had indicated that Andhra Government are taking steps to restrict their load requirements to 2,000 K.W. but fr m the daily Maximum Demand Readings from March 56 to-date, it is seen that they are exceeding the limit of 2,000 K.W. invariably on each day.

4. Further, the period of currency (i.e., 8 years) of the above agreement commenced on 7-6-1949 (date on which the power supply was arranged for) and will end by 6-6-1957. I had, in the marginally noted letters of this office, requested the Andhra Government to intimate their acceptance for the ~~ter~~ release of the entire load of power (catered to them by us) from 7-6-1957. In reply the Chief Engineer, for Electricity, Government of Andhra Electricity Department, had in his letters Nos. E/1/A-3/M-S/457 dated 26-5-56, E1/A/%/M.S/554/ dated 28-6-56 and E/1/S.G. S.E.T/ 5341 dated 3-11-56 indicated that the agreement may be extended beyond the eight years period and that as their power & position can be correctly reviewed only during April 1957, he would revert onthe subject in April 1957 etc.

Letters of this office:

1) D.O.No. B/674/167 dated 14-4-56 addressed to Sri B.R.Somayalulu, Chief Engineer for Electricity, Govt.of Andhra Electricity Department,
2) This office No.B/674/14666-7 dated 5-6-56 addressed to Chief Engineer, -do-

5. Fromthe above, it could be seen that the Chief Engineer for Electricity, Government of Andhra, has not been taking any effecti action either to release immediately the loads utilised by them in excess of 2,000 K.W., or to release the entire load (that is being availed of by them) positively on 7-6-1957. Further, as consider difficulty is being felt by us to meet the loads of consumers wit this State and as our Hon'ble Chief Minister during his visit to Shimoga last month, had expressed his desire to cater the above lo of over 2,000 K.W. to consumers within our State, I request you ki to see that the Ministers of Government of Andhra are addressed immediately by our higher authorities, with a request to take defi action in regard to the above. Early orders of our Government ma also be obtained and communicated directing this department (1) to restrict their present supply of power to 2,000 K.W. with immediat effect and (2) to stop the supply of power to their entire load

Sub: Power supply to Andhra Government.

I write to invite your kind reference to my letter No. A/B/674/58302-3 dated 5-12-1956 wherein, I have indicated the need for our higher authorities addressing the Ministers of Government of Andhra in regard to the unconditional release from 7-6-1957 of the entire load (of over 2000K.W) now being availed of by Andhra Government and for the issue of orders of our Government directing this department not to supply power to Andhra Government in excess of 2,000 K.W. and to stop the supply positively from 7-6-1957.

As no reply is received from you, I write to request you kindly to intimate me very early if my proposals contained int he above letter are acceptable to our Government, duly indicating the course of action to be taken by me.

Awaiting a very early reply.

for Chief Engineer, Electricity.

Letter of D. O.No. A/B/674/3619 dated 22-3-1957 from Sri J.L. D' Sa, B.E., B.Sc.,(Hons),A.M.I.E.E., Chief Engineer, Electricity, Govt. of Mysore, Bangalore to Sri D.K. Srinivasachar, I.A.S., Secretary to Govt., Electrical Department, Bangalore.

24 MAY 1957
ELECTRICAL BRANCH

Sub: Release of the load of about 2000 K..
(reserved for Andhra) from 7-6-1957.

I write to invite your kind reference to the marginally noted letters on the above subject and reg to state that you hav as promised in your l dated 26-5-56, indica ur acceptance for the release of the above load.

D.O.No.B.674/167 dated 14-4-1956 (of my predecessor late Sri G. Chandy).
Your letter No.E1/A3/[illegible]s/457 dated 26-5-56.
This office letter No.B.674/14606-7 dated 5-6-1956.

The agreement stipulates that the same may be extended by period of 8 years and for further period on terms and condit be mutually agreed upon, vide clause 19 (11). But as you a are, because of paucity of power in the State and increased (tments due to States Reorganisation as well as aided industr tablished in the State we have been very hard put to caterin ver to consumers within the State itself. As such I would r at the Superintending Engineer, Ananthapur, may kindly be ad case out the above load completely by 7-6-1957. Due to very assure from various sources both in North Karnatak and the E ast, this power has already been allotted to various consume nce I would request you kindly to comply with our request fo release of the entire load with effect from 7-6-1957.

The Divisional Electrical Engineer, Bellary, has been requ take suitable steps in this behalf. Your immediate compli requested.

Yours sincerely,

[illegible]

the Superintending Engr.,Operation,Ananthapur,for kind info ma request to stop availing any power from 7-6-57.
the Divl.Elecl.Engineer,Bellary,for infn.& guidance.with ref: ter No.R/696 dated 7-5-57.

To

The Secretary to the Govt. of Andhra Prad
Public Works and Transport Departmen
Hyderabad.

Sir,

Sub: Power supply to the Government
of Andhra.

I am directed to state that in accordance with the agreement entered into with the Compo site State of Madras, power supply to the exte of 4000 KW was agreed to be supplied to the Ceded Districts for a period of 8 years from the 7th June 1949. Consequent on the merger of Bellary with Mysore from 1st October 1953, part of this power supply under the agreement got transferred to the Government of Andhra an the Government of Andhra are now receiving and utilising that part of the power. The agreem which was entered into with former Madras Stat for a period of 8 years expires on the 7th June 1957.

I am therefore to inform you that power supply to Andhra Pradesh State under the above mentioned agreement will have to cease with effect from 7th June. Arrangements may kindl be made on your side to switch over your syste to an alternative source of supply in time.

Yours faithfully,

27/5

D. O. No. 987

Bangalore-1, (S. INDIA) 21 June 1957.

SECRETARY TO GOVERNMENT 23 Date 24/6/57 PUBLIC WORKS & ELEC DEPTS.

Dear Sri Srinivasachar,

Terminating Jog Power Supply to Andhra Pradesh.

cff 129.

In continuation of my D.O.No.A/B.674/658 dated 22nd May 1957, I enclose herein a copy of the D.O.No.SET/El/A3/MS/1503 dated 6-6-1957 addressed to me by Sri B.R.Somayajulu, Chief Engineer for Electricity, Andhra Pradesh, wherein he has agreed to my proposal to stop the supply of 2000 K.W. from Jog with effect from 7-6-1957.

This is for your kind information.

Yours sincerely,

D.D. 21.6.6

Sri D.K.Srinivasachar, I.A.S.,
Secretary to Government,
Public Works & Electrical Departments,
Bangalore.

The main file on the subject has been subd to the Minister for PW. for perusal after issue of the letter to the Govt. of Andhra Pradesh.

Copy of letter - D.O.No.SET/El/A3/MS/1503 dated 6-6-57 from Sri B.R.Somayajulu, Chief Engineer for Electricity, - Andhra Pradesh, Branch Office at Kurnool, to Sri J.L.D'Sa, Chief Engineer, Electricity, Govt.of Mysore, Bangalore.

Sub:- Electricity - Supply of Jog Power Agreement Terminating - Regarding.

Ref:- 1.Your D.O.No.A/B/674/635/21-5-57.
2.This office letter SET/El/A3/MS/ 1476/57 dated 23-5-57.

I am in receipt of your D.O.cited above. I consider that this department has the right of continuance of supply of 2000 KW of Jog power as per the agreement. In view of the shortage of power in Mysore State as mentioned by you, I agree as a special case to your proposal to stop the supply of - 2000 KW of power from Jog to this department from 7-6-1957 and that the agreement may be deemed to be terminated at your - request with effect from 7-6-1957. I am separately addressing the Government of Andhra Pradesh to intimate the Government of Mysore accordingly.

With best regards.

Letter No.1566 D/57-4

From

Sri Akbar Nawaz Jung,
Deputy Secretary to Government.

To

The Secretary to the Govt. of Mysore,
Electricity Department,
Bangalore.

Dated: Hyderabad (Dn), the 11th July 1957.

Sir,

Sub:- Electricity - Supply of 2000 KW of power from Jog system of Mysore - Termination of agreement - Accepted.

Ref:- Sri B.S.Srikantiah's letter No.PWD.104 IPL 57 dated 27-5-57.

...

I am directed to state that this Govt. agree as a special case to your proposal to stop the supply of 2000 KW of Jog Power to this State and that the agreement may be deemed to have been terminated at your request with effect from 7-6-57.

Yours faithfully,

(B. Gopalakrishnayya)
for Deputy Secretary to Govt.

To

The Secretary to Government of Andhra Predesh,
Public Works Department, Hyderabad (Deccan).

Sir,

Sub: Electricity - Supply of 2000 K.W. of power ~~Supply of 2000 K.W. of power~~ from Jog System of Mysore -Termination of agreement.

With reference to your letter No.1566 D/57-4 dated the 11th July 1957 on the above subject, I am directed to invite your attention to the fact that in this matter namely supply of 2000 K.W. power from Jog system, there was an agreement between the Government of Mysore and the Government of ~~the~~ composite State of Madras. On the formation of the Andhra State, the Government of Andhra ~~Pradesh~~ was being given the ~~same~~ supply of 2000 K.W. under the terms of the same agreement. That agreement was valid upto 7th June 1957 only. The Government of Mysore in their letter No. PWD 104 IPL 57 dated 27-5-1957 only gave advance information to the Government of Andhra Pradesh that the Government of Mysore would discontinue the power supply after 7th June 1957. This was fully in conformity with the agreement that existed in the matter. There ~~was~~ is therefore no question of the Government of Mysore having approaching the Government of Andhra Pradesh with a proposal ~~and a~~ request ~~to be~~ being treated on special footing.

Yours faithfully,

For Secretary to Government,
P.W. & Electrical Dept.
